ABSOLUTE POWERFUL

GEWO - Table Tennis since 1956

GEWO was originally founded in 1898 in the city of Gellenhausen by Peter Wolf who started his business as a saddler. Two generations later in 1956 GEWO started producing table tennis tables with great success. It took them approx. 10 years until the mid sixties to become the leading table tennis table producer in Europe. Their table business slowed down the next years until Frank Koschnick and Wolfgang Sohns took over GEWO in 1991 and made it one of the biggest table tennis brands in Germany within 10 years. They decided to offer the whole range of table tennis products and only high quality products. Since then GEWO has been growing at a breathtaking pace. The customers love GEWO's unique and highly sophisticated table tennis products and their fashionable textile lines.

In February 1995 we moved to our new headquarter which is on 3000 sqm area. On 2.400 sqm we built up one of the highly developed mailorder houses of Europe. We do daily despatch more than 500 package to our worldwide clientele. More than 300 shops in Germany, Europe and all over the world are among our customers. 25 employees treat our customers friendly, competent and reliable. Although we were small when we started our philosophy remained the same: "The customer is our number one". Personal treatment is at first position. Yesterday like today.

A NEW STANDARD IN MODERN TABLE TENNIS!

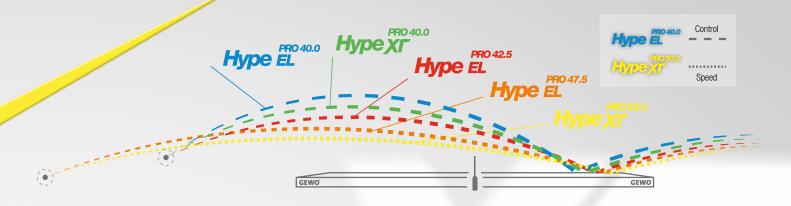

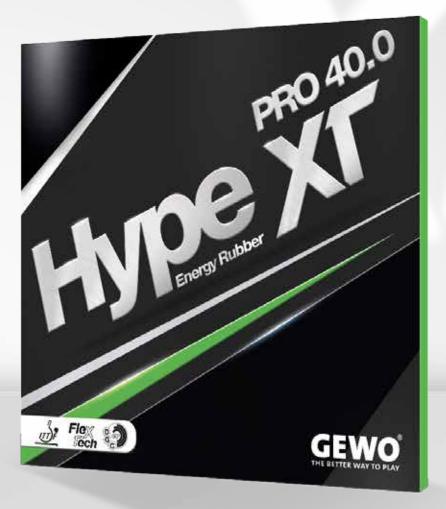

The Hype Pro rubbers are the best-sellers in the GEWO product range. Our scientists/chemists, players of different playing styles and the GEWO team of coaches worked together for more than two years of development to reach one goal: Creating a new dimension of rubber design. The result is something to be proud of: The new FLEX-TECH technology in combination with the tacky DGC40+ top sheet provides for dynamics, spin and great acceleration at the right moment. The high tension of the rubber results in perfect energy transfer to the ball.

- The DGC40+ "Dynamic-Grip-Concept" stands for constant, reliable coupling upon ball contact, and the tacky surface prevents "slipping" of the (poly) ball. The surface was specially developed for and adjusted to the requirements of the poly ball. The GEWO Hype XT Pro series is the right answer to the new poly ball 40+.
- The flexible Sponge/rubber design **FLEX-TECH** which was specially developed for GEWO, produces impressive speed even in the softer 40° version. Both rubbers, combined with the DGC40+ top sheet, transform the speed of your opponent's top-spins into energy and release this energy again in your own stroke when the ball leaves your bat. Enjoy a new experience!

GEWO I Hype XT PRO 50.0

0F+

The premium product of the GEWO Hype series — ultimate speed in a new dimension! FLEX-TECH technology provides for maximum precision in any attacking situation, while the DGC40+ top sheet guarantees constant and reliable coupling when the bat hits the ball. These groundbreaking technologies are ideal for higher-level players. They are fun-to-play and feature convincing catapult effect, high trajectory thanks to maximum surface tackiness and great power with optimum energy transfer for point-winning topspin rallies. The two-year development focused on high forgivingness without compromise as regards speed, control and spin. Despite all the speed and dynamics of its 50° hard sponge, GEWO Hype XT Pro 50.0 still provides for great control for modern, spinny serve/return play thanks to its tacky surface. Unbelievable control for passive balls, blocking and opening flips thanks to FLEX-TECH sponge/rubber design. Truly a new standard in modern table tennis!

- Ultimate combination of spin and high speed.
- Optimum energy transfer for counter-topspin. Slower-speed balls "dig" into the DGC40+ top sheet. This provides for excellent feedback and high energy release when the ball leaves the bat again.
- For attackers relying on maximum power. Enjoy a new experience!

€ 47.90

Item no.: 7764

The GEWO Hype XT Pro 40.0 is the perfect choice for players looking for a soft power rubber with a tacky surface which still provides for sufficient elasticity for attacking. The proven DGC40+ top sheet guarantees uniform, reliable coupling of the ball when it hits the bat, its tacky surface texture prevents the ball from "slipping". The sponge/rubber combination (FLEX-TECH) is soft but still designed for speed, features unrivalled sound, easy handling and is great fun-to-play. This rubber is designed for a higher end speed compared to GEWO Hype EL Pro 40.0. The rubber is a 40° soft "Sound Monster"

- The built-in FLEX-TECH energy produces maximum spin in all strokes.
- Forgiving soft high-end rubber supporting variant-rich, effective Power/All-round playing styles.

giving you the speed you need when you need it. Ideal for players relying on spin and precision.

• For players looking for a rubber featuring elasticity as well as high end speed.

DESIGNED FOR YOUR PLAYING STYLE, CUSTOMISED TO YOUR STROKE

GEWO I Hype EL PRO 42.5

The GEWO hype EL Pro 42.5 is the optimal synthesis of power, spin and surface grip (Dynamic Grip Concept), It is the tempo-elastic middle rubber of the GEWO Hype EL Pro Series and offers a balance between a dynamic and punchy game (Power Tension boost), it provides perfect ball feeling with reliability in all game situations. Thanks to the newly developed DGC40+ - surface, it is possible for a good variation between a punchy serve / return game and a balanced all-round / offensive game. A rubber with exceptional speed in reserve, but despite the high speed, allows good control in the more passive strokes when driving blocking, or pushing. The GEWO Hype EL Pro 42.5 is the perfect rubber

for players who want maximum spin at high speeds. Because: "The last point makes you the winner!"

Speed: 115 \bullet Control: 97 \bullet Spin: 120 \bullet Sponge hardness: medium+/hard Thickness: 1.9 / 2.1 mm

Item no.: 7494

€ 46.90

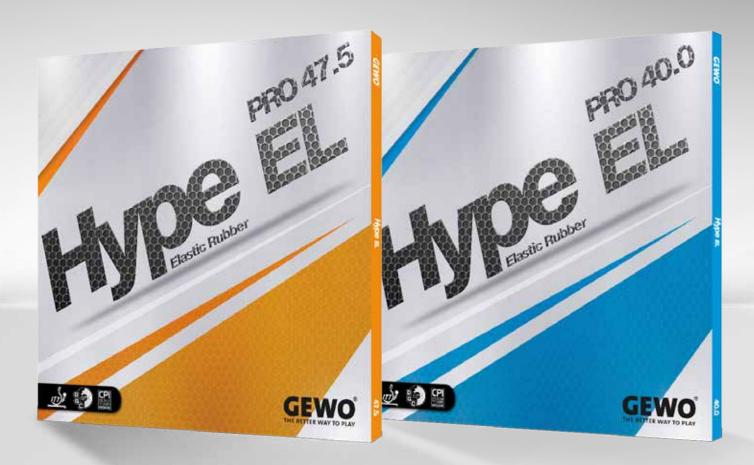

Table tennis has become a very sophisticated sport where the smallest details can make the difference between winning and losing. Therefore, you must be able to rely one hundred per cent on your rubbers in every shot you play. The reliability in all areas of play was the target for the material experts at GEWO. In addition, we relied on the extensive advice of players of all levels when working on the design of this rubber.

This "Made in Germany", high-tech product meets all the criteria demanded of an excellent a rubber for the modern game:

- The **grip** of the rubber prevents "skidding" of the ball and guarantees high precision in every single shot.
- When top-spinning, the GEWO Hype EL Pro is incredibly dynamic with an extremely high arc.
- The **EL- sponge** (Elastic Rubber), is specially designed for GEWO, it provides impressive feeling when hitting the ball during the fastest of rallies
- The **DGC40+** (Dynamic-Grip-Concept) ensures a consistent, reliable contact with the ball, preventing any "skidding" with the new poly ball. The surface was developed specifically to improve the extra spin $\,$ requirements for the new plastic ball. The GEWO Hype EL Pro Series is the perfect answer for playing with the new plastic ball 40+.

Be inspired by the new Hype EL rubbers.

Experience the fascination of high-precision strokes combined with great forgivingness.

THE ULTIMATE WEAPON WITH FLEXIBLE HIGH TENSION TECHNOLOGY

Choose a rubber that suits you: The innovative revolution of nanoFLEX is the new development with the wow effect. It is a premium rubber with the latest high state-of-the-art technology. Players at all levels have participated during the development and testing of this rubber. GEWO technicians have created a new innovative high tech rubber series with nanoFLEX, a geometry adapted pimple structure. The result is an attacking weapon that gives a catapult like acceleration.

The newly developed pimple geometry adapts to the ball surface guaranteeing a highly explosive spinny shot during all playing situations. The highly tacky tension surface generates enormous spin ratings thanks to the very dynamic elastic surface. The nanoFLEX series offers tremendous feeling with the optimum dynamics of spin and power for all professional and serious players.

GEWO I nanoFLEX FT48

0F+

This is the hardest and fastest version with the highest dynamics. A rubber developed for top level professional players who want to win the point with aggressive attacking. Top spins of your opponent can be answered with hard and dangerous counter spins. Despite a tremendous catapult production nanoFLEX FT48 offers utmost control normally seemed unreachable for a rubber of this category. nanoflex FT48 an explosive weapon to give your opponent the shivers.

optimized sound performance

built-in speed glue effect

high dynamic sponge

GEWO | Flexxon FX

The softer version of the GEWO Flexxon is more elastic and therefore gives breathtaking control. A milestone in the development of advanced rubbers. The innovative micro-structure of the surface gives an unsurpassed touch and feel on hitting the ball. The high tech sponge is a perfect base for a good balance between speed, spin and control. The new special sponge makes it easier to place the ball accurately in all match situations and this very forgiving rubber compensates effectively for any misplayed shot. Due to the increased tackiness, vicious services with utmost spin are possible. Close to the table, or during mid-distance play, the Flexxon FX has the ability to enable exciting top spin against top spin play. As well as the excitement of this rubber, the enhanced sound of the Flexxon FX gives the player immediate feedback on the impact and therefore gives better control to your game. This helps to minimise the number of unforced errors. Flexxon FX is a professional rubber that increases your play significantly. Suitable for players of every level. Spin optimized high precision rubber. This rubber combines sound, dynamics, control and utmost energy.

Speed: 110 • Control: 94 • Spin: 113 • Sponge hardness: soft+

Item no.: 5722

€ 44.90

GEWO I Flexxon

The high-tension, dynamic sponge provides the player with great tension- a perfect balance between speed, elasticity and control. Flexxon is the fastest of the GEWO rubbers, created especially for the topspin player who wants a fast rubber with a minimum loss of control. The progressive, tacky surface-struc-ture provides a longer dwell time on the ball giving spin and control. The high-tension rubber surface further enhances the spin while adding speed by means of it's catapult effect. These factors work together to produce a spin ball with a strategy which is extremely difficult for the opponent to control. Rubber for intelligent spin and speed variations Recommended for high-performing players who enjoy an offensive, attacking game.

GEWO | Flexxon Soft

The success story continues with this unique "soft rubber". After the great success of Flexxon and Flexxon FX GEWO has added further version to this series. The Flexxon Soft is softer and more resilient than the FX version. It increases your performances potential with even greater ball control. The Flexxon Soft proves that characteristics like softness and aggressive/offensive play are not mutually exclusive. Flexxon Soft just gives that certain special feeling. The perfect soft graduation provides excellent ball feedback. The main focus for the development of this rubber was to provide extremely well-balanced playing characteristics , suitable for any game. The softer and very dynamic sponge in Flexxon Soft generates more rotation and a longer ball contact time. The player gets to feel the result directly: precision an all strokes. Good power in attacking play and more control on defensive strokes. The high trajectory, the potential play variation in all strokes and the excellent sound emission, make Flexxon Soft an interesting and exciting rubber for any player. Flexxon Soft is ideal for fast, dynamic spin play and opens up new possibilities in half-distance play and active blocking. The rubber give utmost control in every situation. Experience this new exciting feeling. This is a rubber for players of all levels who are looking for an ultra soft and super elastic attacking rubber. Experience this brillant, mix and play more successfully right form the first stroke.

CLASSIC RUBBER

with a new design

The GEWO air technology will change your game!

GEWO's airTEC technology is setting new standards in dynamics and control. This is achieved through a totally new molecule structure (airTEC) compared to conventional rubbers. Thanks to the new GEWO airTEC technology you have considerably more spin, speed and control with an extremely light rubber. A revolutionary production technique "made in Japan". Feel the elastics on all strokes. Target airTEC is the latest weapon for all spin oriented offense players.

GEWO I Target airTEC FX

The one with feeling! This rubber is 10% lighter than the GEWO Target airTEC L, making it very elastic and spinny. Thanks to its softness, the arriving ball can enter deeper into this sponge. This provides the player with the great advantage of both spin and speed but with excellent control.

Attacking players, with a main focus on top spin play will be excited by the great variety of dynamics this rubber offers. A part from the power GEWO Target airTEC FX offers, it will still provide great control. GEWO Target airTEC FX is the most versatile of the Target rubbers, enabling players to experience great feeling with a wide range of possible spin variations.

CLASSICAL GOOD

GEWO | Return Pro

AR+

GEWO | Return Drive

topspin, chop and blocked strokes.

GEWO | Return Chop

GEWO Return Pro was developed for the modern all-round plus player who wants controlled topspin play. This rubber is extremely easy to handle in all situations, giving control and good feeling while still providing all-round/offensive speed. This rubber for mid-level players allows you to play every type of stroke. The soft, forgiving sponge reduces the catapult effect, so that all-round players can play with medium speed and strong spin while having utmost control. The sponge, combined with the very tacky surface, gives excellent feel even when playing slightly away from the table. The Return Pro comes with a very sensitive and elastic sponge. The 2.0 mm version enables you to play a very spinny, precise and controlled offensive game, while the 1.8 mm and 1.6 mm versions provide optimum control at medium speed. With defensive strokes, the Return Pro enables you to play a maximum of spin variations. The extended length of contact time on the ball further increases this effect. This rubber will add to your pleasure when playing. A rubber for maximum precision with all strokes.

Speed: 89 • Control: 99 • Spin: 102 • Sponge hardness: medium

Speed: 85 • Control: 96 • Spin: 96 • Sponge hardness: soft+ Thickness: 1.5 / 1.7 / 1.9 / 2.1 mm

This is a versatile rubber with a high degree of elasticity. Players who

prefer a high level of spin plus good control, without any loss of speed,

will enjoy playing with the GEWO Return series. The Return Drive is a

classic all-round rubber. The tacky, and highly elastic rubber surface,

creates shots with utmost spin for both topspin and chop. The elastic,

soft sponge provides excellent feel on the ball for precision play with

€ 22.90

Speed: 88 • Control: 99 • Spin: 97 • Sponge hardness: soft Thickness: 1.0 / 1.3 / 1.5 / 1.8 / 2.0 mm

The high capacity rubber for all all-round strategists Mega Flex control

gives you a super ball feeling due to long ball contact. It absorbs the

opposing spin and develops own spin with controlled power. Besides

this you have the best security in all situations during the game. Mega

Flex control is developed especially for controlled, modern all-around

player. With a thicker sponge (1.6/1.8 mm) it is suitable for a control-

led offensive strategy (especially for blocking, counter attack and final

shots, with a thinner sponge (1.3 mm) for controlled playing strategy

(driving and disordering). You can operate tactically wise with this rub-

ber with out having to renouncing the security for basic strokes. Due to the high controlling data the own faults quota is drastically sub-

siding. A rubber, which never leaves you in the lurch in any situation.

Item no.: 1460

€ 31.90

Speed: 92 • Control: 105 • Spin: 100 • Sponge hardness: soft+ Thickness: 1.2 / 1.6 / 1.8 / 2.0 mm

Nano S/speed control is perfect for controlling the ball in all situations

in a match. This rubber has this state of the art sponge of technology built in to enrich your all-round control play. Nano S/speed control has

a softer sponge that helps to regulate offensive rubbers without the loss

of control. Nano S/speed control allows returns with chop or attacking

shots during a counter rally easier than ever. Hardly any other rubber

is as forgiving or as ciontrollable as GEWO Nano S/speed control. You

will dominate and control your opponent right from the very first service.

60 YEARS TABLE TENNIS EXPERIENCE MEANS THE BEST QUALITY FOR YOU!

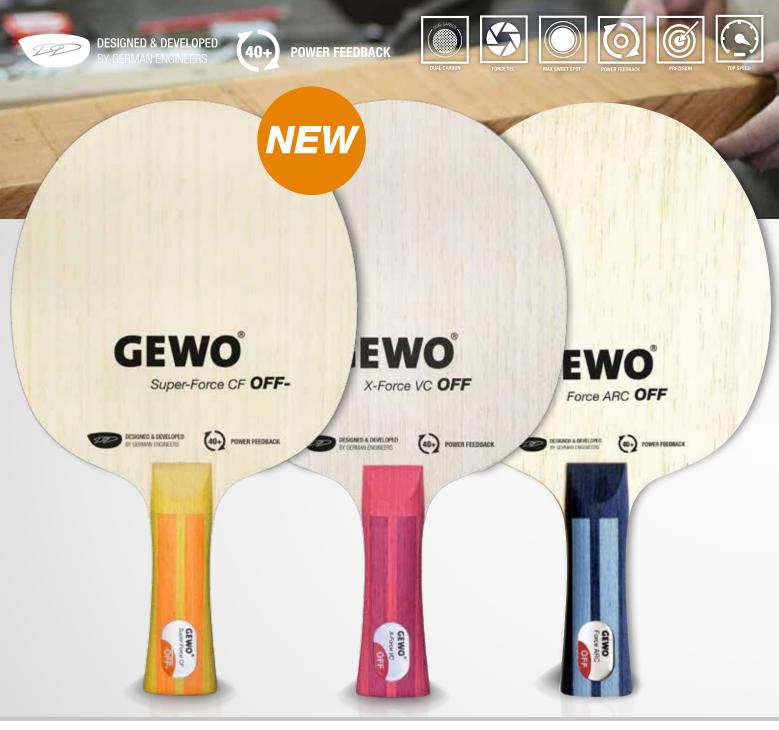

GEWO | Super-Force CF

OF-

GEWO Super-Force CF OFF- is the perfect complement to the GEWO Force series. It is made of three wood plies (Kiri core and Koto and Acacia outer plies) as well as two carbon layers. The Carbon CF used in this blade provides for better control and dependability (Power Feedback) compared to aramid (ARC) or V-Carbon (VC). Super-Force CF OFF- is an elastic blade offering amazing control plus great speed and spin for attacking. In passive playing situations, players will enjoy the extraordinarily constant bouncing characteristics (sweet spot) of Force-Tec. The well-balanced ply composition guarantees consistent control in all playing situations. At the same time, the blade has great speed potential and enables a higher ball trajectory to meet the requirements of modern table tennis. In serve/return or blocking/countering situations, you can always rely on the unique feel and "Power Feedback" of GEWO Super-Force CF OFF-. A high-end OFF blade!

GEWO I X-Force VC

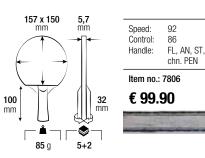

Following successful market launch of the first GFWO Force blade a couple of years ago, the GEWO material specialists now introduce an innovative combination of state-of-the-art materials with unique Force Feeling. X-Force VC OFF is a high-tech, premium product. Compared to its "little brother", GEWO Force ARC, the thickness of the core and the coated center wood ply was increased slightly by 0.2 mm and 0.1 mm, respectively. The blade features two V-Carbon layers (Dual Carbon) for extra speed. V-Carbon is a highly efficient, modern, premium-performance carbon fiber which is typically used in lightweight designs in aviation, motorsports and automotive engineering. This fiber provides the blade with enormous power and speed for attacking and topspin rallies. The slightly thicker core guarantees great feel (Power Feedback) for modern serve/return playing techniques. GEWO X-Force VC OFF is the ideal blade for modern power attackers looking for ultimate feel.

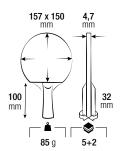

GEWO I Force ARC

0F

This component production is made with a 7 layered offensive blade. It combines the High-Tech-Materials Carbon and Aramid (ARC) with high quality, deposited wood veneers. Carbon provides high speed and extreme stability, and Aramid provides a good feeling. Feel the balanced hardness and the optimal feeling. Consistent playability on nearly the entire blade by specially selected veneers. The achieved stiffness leads to a high stability and a straight pressure in the game. The high strained, stabilizing Aramid Carbon layers provide extra speed, that you need for a powerful and dynamic offensive play. Powerful play with the consistent variations of the ARC materials. With the Force ARC each player can place the ball close to the table perfectly and act out of half distance with fast and hard topspins. The premium blade Force ARC is recommended for topspin players with main focus speed, who want the rally to be aggressive and want to impose the opponent's own game. Feel

GEWO | Zoom Balance

AR+

GEWO I Zoom Pro

OF-

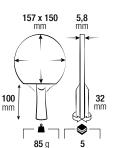

GEWO | Zoom Pro Light

OF-

GEWO Zoom Balance ALL+ combines premium wood plies (Kiri, Ayous, Koto) with two layers of the high-tech material Texalium. With the inner Ayous plies and a Kiri middle ply, it makes a great combination of balance and feel ("Rubber Impulse"). The Texalium layers provide for a large Sweet Spot, good bending strength and unique Power Feedback to meet the requirements of modern table tennis. The speed and control values of this ALL blade were carefully chosen and enable easy switching from passive to active playing and vice versa within the rally. You will always be in control thanks to unique "Power Feedback". This feature is ideal for passive strokes like blocks, pushes, and well-placed returns which will put your opponent under pressure right from the start. Carefully selected wood plies provide for great feel making the blade a great choice for allrounders. In addition to excellent control, the blade also has sufficient speed potential for your own attacks.

Zoom Pro the easiest way to improve your game. Medium-soft core and harder outer veneers. Due to the special bonding, the energy is released step by stepand continuously released. The Zoom Pro is very easy to play and gives you a very good balance between speed, feeling and weight. It plays very variable and is suitable for all offensive game systems. From aggressive top spin players to half distance to block and counter at the table. The blade provides precision and pressure in the offensive game. It never forgets the importance of control and flexibility and offers an unsurpassed feeling in a passive play. The Zoom Pro develops a lot of speed and is very precise and controlled. The fine-tuned-5 layer veneers provide an excellent ball contact time and completely new gaming experience. The Zoom Pro is a topblade in this speed class and first choice when you are looking for a high quality blade. This modern blade has its followers among players of all divisions.

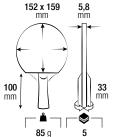

Same composition as its "big brother" GEWO Zoom Pro OFF, but with shorter and smaller handle and adjusted blade surface. Ideal for small hands.

MADE BY GEWO®

The vertically cut balsa core and the 1K-Carbon form the heart of the GEWO Balsa Carbon series. Carbon fibres are industrially manufactured fibres made from carbon-containing raw materials converted to graphite-like carbon in special thermal processes. 1K-Carbon is a very light and strong premium carbon fibre. Compared to fibreglass materials it provides a larger Sweet Spot and better combination of excellent feel and power. If used with the new 40-balls, 1K-Carbon opens up new possibilities and chances compared to other materials, e.g. fibreglass. The slightly thicker Balsa plies (compared to predecessor model) will also help you meet the requirements of modern table tennis.

A maximum sweet spot (optimum ball contact area) is guaranteed by the combination of 1K-Carbon and the vertical balsa plies of the core veneer. With the accurately cut Balsa centre plies (3.75 mm, 5.75mm and 7.75 mm) you can choose the speed/control ratio that best suits your needs.

ROBUST, LIGHT AND INNOVATIVE

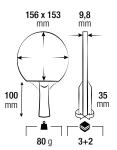

The new GEWO Balsa Carbon series

GEWO I Balsa Carbon 775

GEWO Balsa Carbon 775 is a modern OFF blade featuring the latest high-tech materials. GEWO Balsa Carbon 775 is one of the fastest blades from the GEWO blades range. The 7.75 mm thick Balsa centre ply produces all the power and speed you need for your attacks, without neglecting control and reliability in passive situations. The soft, vertical-cut balsa ply in combination with premium-end 1K-Carbon make the blade a true "Power Tool" for uncompromising attackers. Low-trajectory high-speed top-

spins and aggressive blocks will give your opponents the shivers.

GEWO | Balsa Carbon 575

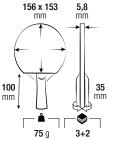

GEWO Balsa Carbon 575 is a controlled, well-balanced OFFblade. Ideal for spin-oriented, direct, close-to-the-table attacking. High forgiveness on "off-centre" topspin hits. GEWO Balsa Carbon 575 is just perfect for players relying on powerful, high-precision ALL/ OFF playing. Thanks to the $5.75\ mm$ thick, vertically cut balsa centre ply, your offensive strokes will have just enough speed at full control. Precise and well-placed attacks, high-speed topspin rallies as well as all passive strokes come easy with GEWO Balsa Carbon 575. Ultimate "feel-good" blade thanks to the combination of soft balsa material and premium 1K-Carbon: For all players relying on powerful and controlled attacking.

94 Speed: . Control: 90 FL, AN, ST Item no.: 7803 € 59.90

GEWO I Balsa Carbon 375

GEWO Balsa Carbon 375 is a modern premium-end ALL blade. State-of-the-art materials and the soft balsa give the blade the feel and control you will need in all passive playing situations. In addition, GEWO Balsa Carbon 375 provides sufficient power for starting your own controlled attacking any time you're ready. Perfect blade for versatile all-rounders relying on precise placement and speed variations to win points. Modern defenders taking every opportunity for own attacks will also be inspired. High-tech 1K-Carbon combined with the proven balsa material provides for a larger sweet spot. This means more forgiveness on "off-centre" hits.

3 GEWO | Velox ∝ Defense

DFI

High-end control carbon blade. The designers of this GEWO blade aimed at increasing precision not just speed. This is why the Carbon layer is placed between the Fineline top ply in Velox alpha Carbon. As a result, this GEWO blade is more dynamic and stiffer. Only premium wood and ultra-thin carbon fibres are used in this precision blade. Velox alpha Carbon combines the tremendous feel of FineLine blades with the dynamic features of carbon. With its low weight, this GEWO blade provides for high control and enables variable playing. Both controlled mid-distance topspins and powerful close-to-the-table strokes are possible at low power input. Precise ball placement becomes easy thanks to the unique ball feedback. Whether powerful topspins, surprising speed changes or hard shots - you will be able to play any stroke easily.

POWER AND CONTROL IN ANY STROKE.

GEWO I Polaris Control Glasfiber

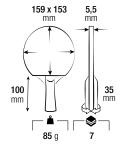

AR+

GEWO I Polaris Powerflex Carbon

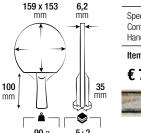

0F

Discover a new dimension. The Polaris Control Glasfiber AR+ meets the demand of many players for a blade with offensive range speed ratings and combined control features of high-end all-round blades. Polaris Control is made of a new type of glass fibre composite. This reinforced power all-round blade provides any all-round player with perfect ball control. It features five perfectly adjusted plies. The outer plies are slightly harder for more power. The special compensation plies increase the ball contact time and, in combination with the Kiri centre core, provide for great feel. The Polaris Control Glasfiber will take all-round players to perfection. Reliable in all playing situation, precise placement, surprising spin variations, and rallies without own faults are typical features of this blade. The components of this blades are adjusted to one another perfectly for an even longer ball contact time and optimum feedback. The plies intertwine and are glued horizontally. The moisture-drained and matured plies have a lower moisture content and weight than standard glass fibre blades. Variable topspin play: from soft and controlled playing to aggressive powerspins. Polaris Control provides for reliability in over-the-table play and precise ball placement. For attacking all-round players preferring variant-rich "Power Control play". This blade is a perfect combination of speed, forgivingness and feel.

The powerful blade for precision in all playing situations. More speed without significant loss of control. Pure, high-tech blade technology perfectly adjusted to the player's requirements. Seven-ply power blade with larger sweetspot, maximum dynamic rigidity, optimum ball control and great feel thanks to natural wood plies. Zero vibration and full directional stability. The ply design is dominated by a special carbon fibre mesh directly embedded under the first ply of premium Koto - the foundation for excellent speed development and great control. The carbon fibres are integrated in an innovative honeycomb compound structure. As a result, the Polaris Powerflex provides for even more dynamics and stiffness. This opens up a whole new dimension of opportunities with dangerous topspin strokes. Thanks to the high bounce, you can produce loads of rotation, particularly in topspin strokes. while the excellent control ratings provide for optimum ball control. Uncompromising attacking at ultimate precision. This blade enables any player to take full risk in their whole repertoire of strokes. Especially, short-arm techniques, precise smashes, counter-attacking and all blocking techniques can be played much better than with standard blades. A perfect blade for any attacker relying on spin variations and dynamics.

GEWO PREMIUM BLADES

GEWO THE BETTER WAY TO PLAY

Advantages of GEWO® CrossFuse Lamination Technology (CFL):

- · Low weight thanks to balsa core plies.
- · Better bounce across the whole blade area.
- Optimum vibration absorption across the whole blade.
- · CrossFuse gluing increases control and reduces vibration.
- · High forgivingness thanks to stabilized sweetspot.
- · Uniform sweetspot for more speed and precision.

Blades made of composite materials

The GEWO® CFL blade series is a perfect union of technological innovation and design. CFL Technology only uses the best raw materials and enables the production of high-stability blades for additional power without any losses in comfort and control. CFL Technology enhances the playing features of any blade in a unique way. The Balsa core ply is combined with a vertical honeycomb mesh. Thanks to this design, there will be no vibration when the ball hits the blade. The balsa core enables the production of very light blades featuring maximum control.

GEWO I Hybrid Carbon M/Speed

OF-

GEWO | Hybrid Carbon X/Speed

GEWO I Hybrid Carbon A/Speed

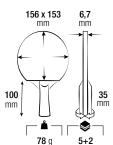

0F

AR+

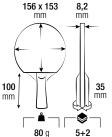

The Hybrid Carbon M/Speed (Moderate Speed) blade provides excellent playing features thanks to CFL Technology as well as a maximum of controlled power combined with extraordinary ball control. Hybrid Carbon M/Speed is the perfect balance of speed, weight and flexibility. Experience more power and spin for topspins and smashes and great feel and control in short balls and passive blocking. Enjoy a wide range of new opportunities you may have never thought possible. Hybrid Carbon M/Speed opens up a whole new material dimension: Powerful, straight topspin play without annoying vibration. More power and precision in each stroke When playing at moderate bat and ball speed, you will enjoy a new experience of power, forgivingness and precision. This special feeling will inevitably take your attacks to a new level of success.

Thanks to CFL Technology, the Hybrid Carbon X/Speed provides unbelievable directional stability, especially in high-speed rallies. A premium-end offensive blade with exceptional power. The unique composite structure of the blade not only enables fast and hard playing but also provides for a new spin experience. Featuring a stabilized sweetspot for even more reliability and precision, this blade generates to-the-point attacking power even in critical situations. Compared to standard blades in this category, the Hybrid Carbon X/Speed provides much more feedback when the bat hits the ball. Experience breathtaking acceleration with CFL Technology. This blade will be a thrill for any demanding, performance-oriented player.

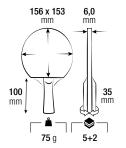

Ultralight all-round blade for ultimate control. The balsa ply provides for exact and to-the-point feedback when the blade hits ball. With maximum reliability in all playing situations, this extraordinary all-round blade enables precise placement and reduces the number of unforced errors. The built-in CFL Technology provides for excellent speed and acceleration. With Hybrid Carbon A/Speed you will always be in control of all types of strokes and any playing situation. Thanks to the low weight of this all-round blade, you can easily vary the amount of spin or suddenly switch to a different strategy in the rally. The ideal blade for versatile all-round players relying on speed/spin variations to win the point.

GEWO | Plastic covering Protect

The special protective foil bag designed by GEWO protects any table tennis rubber against dust exposure. The handy foil bag prevents the sensitive rubber surface from becoming brittle due to exposure to atmospheric oxygen. After your match, clean the rubber with GEWO Fair Clean rubber cleaner and GEWO microfibre sponge. Put the head of the blade in the foil bag making sure to avoid air bubbles between the rubber and foil. Longer rubber life and preservation of properties.

"THE GAME IS NOT JUST ABOUT WHAT YOU HAVE IN YOUR HANDS"

Unlike the name would suggest, table tennis is by far more than just "handwork". In fact, good footwork is essential if you want to be a great player. Your feet need the right partners to give you the security and stability you need in any playing situation.

TT-SUPER

simply the best

GEWO | TT-Super

We have re-designed our classic table tennis shoe. The high-friction special, non-marking, indoor sole which has been used for years offers excellent skid resistance and ensures secure footing on any type of floor. In addition, the lightweight shoe provides for direct floor contact, a feature most players highly appreciate. Improvements include re-designed top material and additional sole stitching. Exceptional footwear with soft, robust top material, combined with air-permeable, breathable mesh nylon. Reinforced, padded heel counter for more stability and comfort. Solid workmanship for long life. Premium-end footwear with unbeatable value for money.

NEW GEWO HEAD-COACH

Dimitrij Mazunov now in charge of development of GEWO top talents.

We are proud to announce that Dimitrij "Dima" Mazunov is now our new head coach and material expert and will also be in charge of individual development of the GEWO junior talents at the LIEBHERR Masters College. As a former world-class player, four-times Olympian and multiple World and European Championship medalist, "Dima" has second-to-none table-tennis expertise. Dima was already a valuable contributor in team developing new GEWO Hype XT Pro rubbers and will use his material expertise to help our promising European top talents find and choose the ideal equipment. In addition to his commitment in top-class table tennis, "Dima" is well aware that table tennis cannot survive without the daily work of thousands of volunteer coaches and all the players of all levels. A major part his work will also address the needs of these coaches and players.
