PENHOLDER

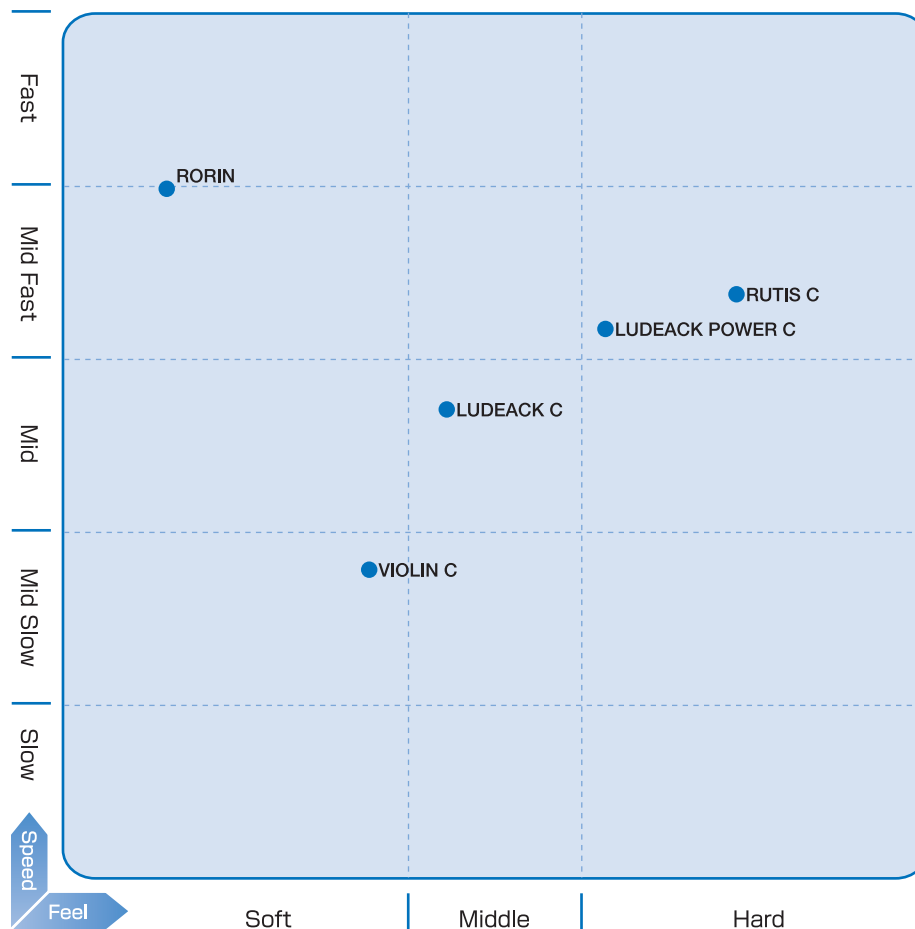

CHINESE  
STYLE  
PENHOLDER

STRAIGHT FLARE ANATOMIC CONICAL

### PENHOLDER BLADE

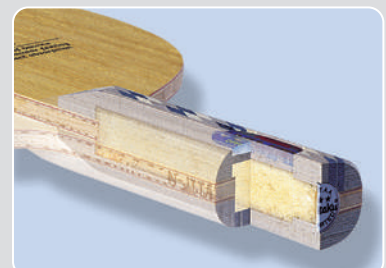

### Wood Edge Guard

This protects your blade at the edge. And also this makes Sweet Area larger.

### Super Core System

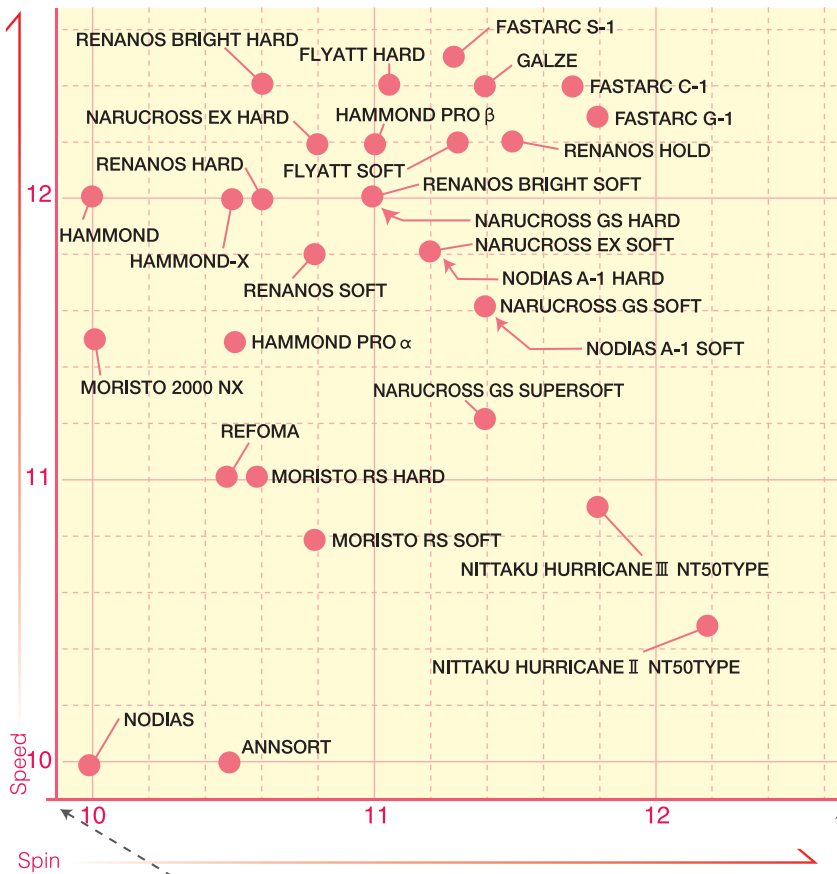

Special sponge core makes blade lighter and good feeling.

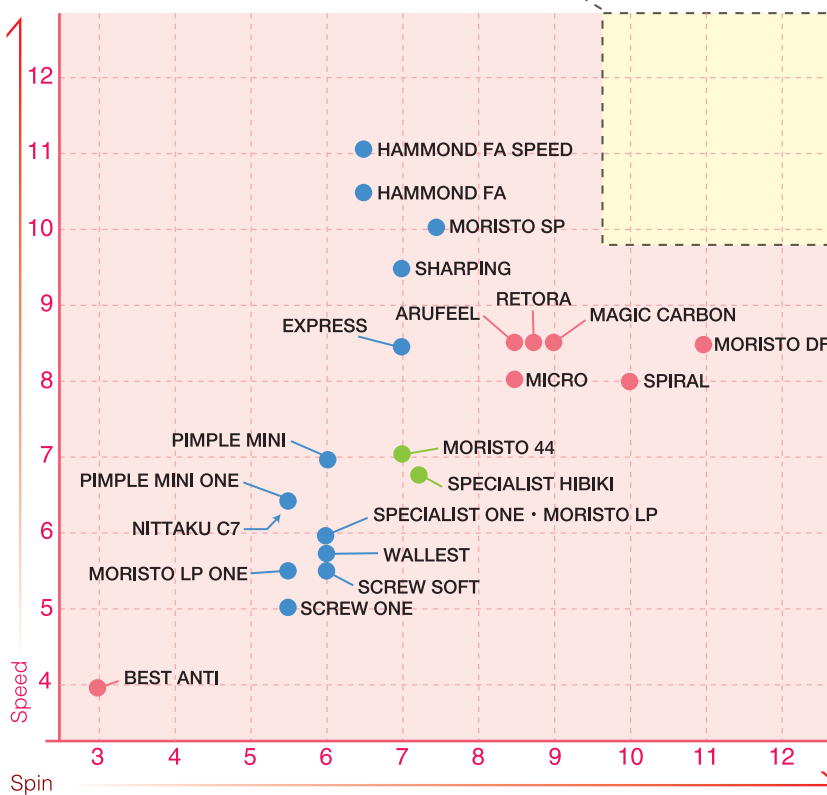

## Performance of Rubbers

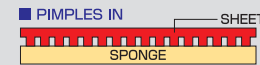

### RUBBERS VALUE magnification

### RUBBERS VALUE

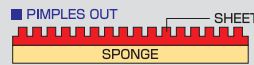

### PIMPLES IN

Flat surface and big friction can make a lot of spin. There are many types of rubbers such as more elasticity and more friction, etc. Less friction and elasticity rubbers are called Anti Rubbers which are indifferent to opponent's spins due to the slippery rubber surface.

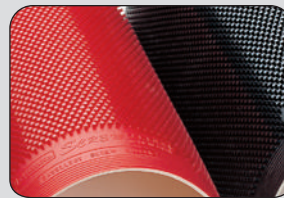

### PIMPLES OUT/ PIMPLES OUT WITHOUT SPONGE

Due to the pimples on the surface it knocks a ball away but less spin. And it is not easily affected by the opponent's spin. PIMPLES OUT WITHOUT SPONGE is good for stability of block and chop due to less elasticity.

### LONG PIMPLES/ LONG PIMPLES WITHOUT SPONGE

This serves a ball with unexpected spin due to the various movements of pimples in hitting a ball. This rubber is suitable for the combination with pimples in rubber.

## Rubber Classification

Speed  
12.0

Speed: 10  
= Nodias speed

Spin  
10.6

Spin: 10  
= Nodias spin

<b>IE</b>	Integrated Energy
<b>AC</b>	Active Charge
<b>Tension</b>	Energy Inbuilt
<b>Sticky</b>	High friction due to the adhesiveness component
<b>Elasticity</b>	Good Speed
<b>Control</b>	Good Control
<b>Knuckle</b>	Unexpected Spin

## Sponge Thickness

**Super Thin** (1.0)  
0.9mm ~ 1.1mm

**Thin** (1.2)  
1.1mm ~ 1.3mm

**Middle** (1.4)  
1.3mm ~ 1.5mm

**Middle Thick** (1.6)  
1.5mm ~ 1.7mm

**Thick** (1.8)  
1.7mm ~ 1.9mm

**Super Thick** (2.0)  
1.9mm ~ 2.1mm

**Max** (MAX)  
2.1mm ~

# Fastarc

## What's Fastarc?

Fastarc is "Fast" with an "Arc". This is the new technology rubber for players who desire high speed balls, ideal arc, powerful top spin and touch for all strokes of your game.

## The Performance of "C-1" "S-1" "G-1"

**C-1** : Excellent balance between speed and spin

**S-1** : Great for high speed balls

**G-1** : Powerful top spin and ideal arc

	Sheet		Sponge		Speed	Spin	Control
	Tension Spin	Tension Speed	Strong	Soft Strong			
 <b>C-1</b>	○			○	12.4	11.7	◎
 <b>S-1</b>		○		○	12.5	11.3	○
 <b>G-1</b>	○		○		12.3	11.8	○

## The Arc of "C-1" "S-1" "G-1"

**C-1** : middle arc

**S-1** : low arc

**G-1** : high arc

## Catch First version of Fastarc

The concept of C-1 is "Catch", it features a Tension Spin top sheet and Soft Strong sponge. You can feel the excellent balance between spin and speed.

### Tension Spin top sheet

It creates powerful top spin like Fastarc G-1.

### Soft Strong sponge

It is great for high speed balls like Fastarc S-1.

MADE IN JAPAN

NR-8561

### Molecular Reinforcement System Loaded

This system improves the strength of natural rubber component in molecule level to produce excellent speed.

This system offers durable quality for using long time.

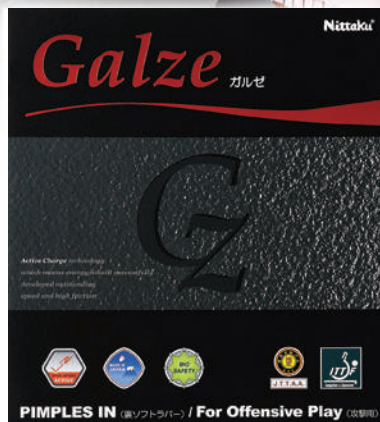

### Active Charge (AC) Loaded

Active Charge creates extreme powerful top spins and excellent ball touch.

## Glorious Debut, the Evolution for the Victory!

AC

### GALZE

PIMPLES IN

MADE IN JAPAN

NR-8557

Top grade natural rubber sheet and Active Charge(AC) technology fused and created the unexperienced high performance in plays such as extreme powerful top spins and delicate fine ball touch, etc.

## Extreme Spins of new IE Rubber Innovation

IE

### RENANOS HOLD

PIMPLES IN

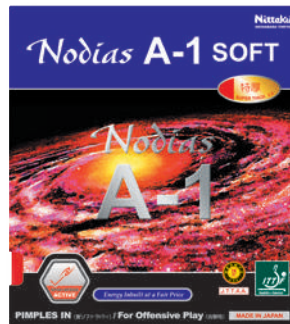

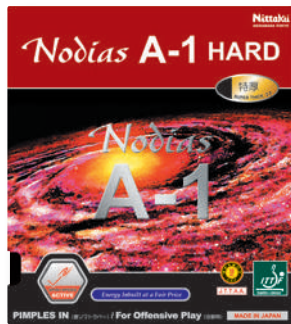

MADE IN JAPAN

NR-8551

Using IE(Integrated Energy) technology as a base, Rubber molecule is more active by Active Charge technology. Renanos Hold makes a breakthrough in spin and speed of table tennis sport. You can feel the comfortable feeling of holding the ball.

AC

### Energy inbuilt at a fair price

High grade natural rubber and Japanese rubber technology successfully developed outstanding speed and high friction.

20 Red	71 Black	Speed 5.0	Spin 5.5
--------	----------	-----------	----------

(WITHOUT SPONGE)

\*With an adhesive sheet for quick attaching.

There is no compromise with our technology with these blades, you can play as if you play string instruments, in sound and vibration.

FL NE-6849

### For professional model

Made with "String Instrument Manufacturing Technology", much more suitable for power players.

#### TENOR

##### OFFENSIVE

MADE IN JAPAN

5ply wood	60mm thickness	92g (±)	Speed Mid Fast	Feel Hard
259 × 151mm	ST	101 × 22.5mm	FL	101 × 23.5mm

FL NE-6760

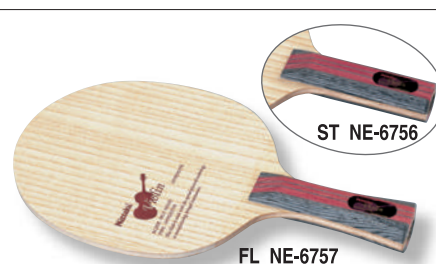

Made with "String Instrument Manufacturing Technology" Thicker and softer materials than "VIOLIN" are used. This has stability in both attacking and blocking.

#### ACOUSTIC

##### OFFENSIVE

MADE IN JAPAN

5ply wood	57mm thickness	88g (±)	Speed Mid	Feel Middle
257 × 150mm	ST	100 × 23mm	FL	100 × 22mm

FL NE-6757

Very unique elasticity realizes new ball-touching feeling Hard but elastic, high capacity blade with "String Instrument Manufacturing Technology".

#### VIOLIN

##### OFFENSIVE

MADE IN JAPAN

5ply wood	53mm thickness	88g (±)	Speed Mid Slow	Feel Soft
256 × 149mm	ST	100 × 23mm	FL	100 × 22mm

FL NE-6869

### The compact shape of Violin

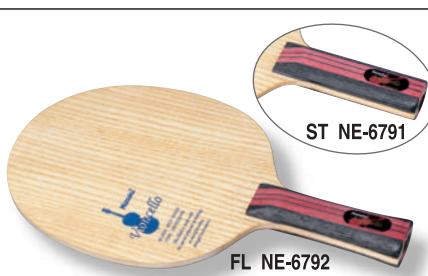

"String instrument manufacturing technology" creates very unique elasticity and new ball-touch feeling.

#### VIOLIN J

##### OFFENSIVE

MADE IN JAPAN

5ply wood	53mm thickness	80g (±)	Speed Mid Slow	Feel Soft
251 × 148mm	FL	97 × 23mm		

FL NE-6792

### "VIOLIN" defensive model

Based on "VIOLIN" model, for defensive. Made with "String Instrument Manufacturing Technology" method.

#### VIOLONCELLO

##### DEFENSIVE

MADE IN JAPAN

5ply wood	53mm thickness	92g (±)	Speed Mid Slow	Feel Soft
264 × 154mm	ST	100 × 23mm	FL	100 × 24mm

NE-6648

### Very unique elasticity

Chinese Style Penholder. Made with "String Instrument Manufacturing Technology".

#### VIOLIN C

##### OFFENSIVE

MADE IN JAPAN

5ply wood	53mm thickness	84g (±)	Speed Mid Slow	Feel Soft
243 × 151mm	CHINA	82 × 23mm		

## Blade Material Chart

	Type	Material	Image Picture	Feature
Fast ↑ Speed ↓ Slow	High Speed	Kevlar® Carbon		Kevlar Carbon is made combining with Kevlar and Carbon fiber. This causes high speed and stability.
		G-Carbon		G-Carbon is made combining with UD-Carbon and Glass Cloth. In addition to high speed performance, you will get much easier in control ability.
Speed	Speed	L-Carbon		L-Carbon is made combining with Lithe fiber and Carbon. High speed performance, with seizing ball at hitting.
		Kevlar® Speed		Much more speed than Kevlar. This is good combination with Hinoki plywood.
Mid Speed	Mid Speed	UD-Carbon		This is one ply lengthwise applied carbon fibers and is an intermediate efficiency between Carbon and Super Thin Carbon.
		Texalium™		Texalium is fiber combined with flexible Glass Fiber and Aluminum alloy.
Speed Plus	Speed Plus	Kevlar®		Aramid fiber, Kevlar has given us many important elements of table tennis. Speedy ball with soft feeling at the impact can be gotten.
		Glass Fiber		We have made glass melted and made it into cloth-fiber. This is the material of light weight wide sweet spot.
		Super Thin Carbon		We have made strong and tough Carbon into very thin fiber sheet. You can have both Carbon advantage as well as wood characteristic fully.
		Super Thin Aramid		By making Aramid fiber thinner ever, the blades using it have stable of control.

# Finezip

MADE IN JAPAN

## Water-based glue according to the new ITTF regulations

Without volatile organic solvents (VOC) Finezip has a strong adhesively but you can peel off a rubber without damaging a blade.

NL-9625 FINEZIP 25 (25ml)

NL-9622 FINEZIP 50 (50ml)

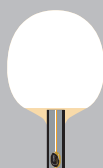

NL-9623 FINEZIP 100 (100ml)

NL-9624 FINEZIP 500 (500ml)

### How to glue with Finezip

Apply Finezip to both the sponge and the blade with one direction.

Leave them for 15 minutes until the milky white color of Finezip becomes transparent.

It is time to affix a rubber to the blade and press uniformly then cut the rubber.

※Keep Finezip at the place with 5~40°C. Please pay attention that it will solidify under 5°C  
※Each Finezip has one ZIP SPONGE each in the package.

### ZIP SPONGE

6 pcs./set

NL-9626

MADE IN JAPAN

Smooth type water-based glue with VOC free, plus 10 sponges and a clip included.  
Easy to remove from sponge and racket.

### IMPORTANT

The foam roll should not be re-used.  
Always use a new, clean roll.  
Never use other liquids at the same time.
