BLADES

SEASONING

Careful attention is required to guard against drying the wood too rapidly, particularly in wood with thicker dimension. If not dried properly, the non-uniform stresses involved can cause cupping or twisting upon sub-sequent re-sawing or working. Once wood has been dried, it is allowed to "rest" in a climate controlled environment for several days to several months.

GLUE

The use of different glue results in different playing characteristics. Different woods need different glue for best performance. At STIGA we use the best glue and gluing techniques for the best results for each type and combination of wood.

MADE IN SWEDEN FOR THE WORLD CHAMPIONS

The search for the right blade can be a huge challenge, even for the most experienced players. The best blade for one player is not necessarily the best choice for another, as we each have our own personal touch and style, and we tend to react to blades in different ways.

At STIGA we make this important choice easier by ensuring that every blade is of superior quality, and we make blades with the variety of special playing characteristics demanded by experienced players and coaches.

WOOD

Our design process begins by considering the playing characteristics of each of the woods we use. Remember that we're talking in general terms here, since each tree, and even each set of wood, is different. Fortunately, here at STIGA we benefit from having played with hundreds of versions of particular models, so we have learned from vast testing and experience how to design the blades "personalities" to perfectly suit the next generation of World Champions.

GRIP

WRB **THE WRB SYSTEM** accelerates the blade face for faster returns, more power and extra sensitivity of touch.

CR **THE CR SYSTEM** is when front part of the blade is UV-finished, which yields a reasonably increased speed to the ball.

OVER SIZE **OVERSIZE** has thicker blade that offers approximately 10% extra speed compared to conventional blades. Larger head offers extra stability of touch and feel.

CRYSTAL TECHNOLOGY increase your speed. Normal blade treatments use regular lacquer, but Crystal Technology employs a transparent hydrophilic gel lacquer that STIGA specially developed.

VPS **VPS** (The Veneer Precision System) treats the veneers with a unique and exact heating and cooling process. This results in a very solid balance and fantastic feel.

DIAMOND TOUCH technology gives the outer veneers extra hardness and the surface an incredibly smooth finish.

THE NCT TECHNOLOGY blades use our nano technology.

TEXTREME® TECHNOLOGY a Spread Tow Carbon that increase speed and sweet spot on the blade.

CHOOSE THE RIGHT STIGA BLADE

Please observe that this blade table only compares the STIGA blades related to each other. The following characteristics decide the table mentioned beneath. The hardness of the veneers, the blades total weight, the thickness of the blade and the different

effects of the unique STIGA blade technologies (WRB, CR etc...). Use this blade table as guidance for you to make the right choice of STIGA blades.

CARBONADO SERIES ANOTHER ANGLE OF CARBON

For the new Carbonado blades we have taken the carbon blade manufacturing to a new level by using the made in Sweden carbon technology known as TeXtreme®. The blades are built with five layers of wood and two layers of lightweight TeXtreme® Spread Tow Carbon fibers. This unique and patented carbon is the first of its kind and has never before been experienced in Table Tennis.

NEW

CARBONADO 145

CONTROL	44
SPEED	145
ELASTICITY	STIFF
VENEER	5+2
STYLE	OFF+

- Carbonado 145 is constructed with Carbon layers in a 45 degree angle
 - 45 degree angle provides torsional bendability which gives the blade more flexibility and increased stiffness
 - The high trajectory makes it a perfect choice for the offensive player who looks for good speed and stability combined with excellent control
 - Wide personalized sweet spot
- ART. NO. 1065-XX

NEW

CARBONADO 190

CONTROL	44
SPEED	145
ELASTICITY	STIFF
VENEER	5+2
STYLE	OFF+

- Carbonado 190 is constructed with Carbon layers in a 90 degree angle
 - 90 degree angle provides flexural bendability which gives the blade a stiff feel with great stability and high speed
 - The longer and flatter trajectory makes it an excellent choice for players who want to command the gameplay with high speed strokes.
 - High personalized sweet spot
- ART. NO. 1060-XX

The special TeXtreme® Spread Tow Carbon is flexible in only one direction, either flexural or torsional, making it possible in the manufacturing process to adjust and improve the ball trajectory and speed to accommodate playing style. The two layers of carbon are applied in a 45 degree angle or a 90 degree angle.

The Carbonado blades offers the player a personalized Sweet Spot. The Carbonado 145 with its torsional bendability gives a wider Sweet Spot and the Carbonado 190 and its flexural bendability gives a higher Sweet Spot.

Experience the result of years of research and engineering. Experience the TeXtreme® Carbon feeling!

VPS SERIES WITH DIAMOND TOUCH

VPS (The Veneer Precision System) treats the veneers with a unique and exact heating and cooling process. This results in a very solid balance and fantastic feel. The technology gives the outer surface extra hardness and an incredibly smooth finish. The Diamond Touch technology gives the outer veneers extra hardness and the surface an incredibly smooth finish.

HARDWOOD SERIES WHEN NATURE MEETS SCIENCE

Hardwood blades balance speed, weight, flexibility and trajectory for an unbeatable formula. These are developed in close cooperation with our top players and the Chinese National Team to meet their demands for the best high-performance blades. Each ply of the Hardwoods carefully handpicked to ensure the very best wood grain and quality. The highquality wood used in these blades is very hard to find, so producing these blades is a time-consuming and labor-intensive process. The results are worth it!

The mixture of special and unique Hardwood, enhanced with STIGA's scientific engineering and NCT (Nano Composite Technology) results in the hardwood blades that will be most in demand for the future!

ROSEWOOD XO

CONTROL	62	
SPEED	118	
ELASTICITY	STIFF	
VENEER	5	

- Offensive 5-ply blade for the offensive player who still puts focus on control
 - Built with exclusive, aged and seasoned Rosewood outer veneers
 - A high quality blade that provides outstanding feeling and touch with a smooth sound
 - Rosewood XO provides extra speed and feeling compared to the Rosewood NCT V
 - Used by Abdel-Kader Salifou (FRA)
- ART. NO. 1092-XX**

ROSEWOOD NCT V

CONTROL	63	
SPEED	113	
ELASTICITY	POWER	
VENEER	5	

- Offensive 5-ply blade for the modern attacking game
 - Ideal for the offensive player who demands speed combined with control
 - Exceptional balance of speed, weight, control and trajectory
 - Beautiful hand selected Rosewood veneers of the highest quality
- ART. NO. 1078-XX**

ROSEWOOD NCT VII

CONTROL	49	
SPEED	139	
ELASTICITY	STIFF	
VENEER	7	

- Very offensive 7-ply blade with beautiful Rosewood veneers
 - Maximum stability and feeling on powerful strokes
 - Increased sweet spot thanks to the stability of Rosewood veneers
 - Used by Jens Lundquist & Pär Gerell
- ART. NO. 1088-XX**

EBENHOLZ NCT V

CONTROL	62	
SPEED	115	
ELASTICITY	POWER	
VENEER	5	

- Offensive 5-ply blade for the modern attacking game
 - A well-balanced state of the art blade, suitable for all playing strategies
 - Beautiful hand selected Ebenholz veneers of the highest quality
- ART. NO. 1079-XX**

EBENHOLZ NCT VII

CONTROL	46	
SPEED	141	
ELASTICITY	STIFF	
VENEER	7	

- Very offensive 7-ply blade
 - Beautiful hand selected Ebenholz veneers of the highest quality
 - Extreme speed and stiffness for the player who want best possible speed and feeling combined
 - Increased sweet spot thanks to the stability of Ebenholz veneers
- ART. NO. 1089-XX**

CC SERIES
PURE POWER

The very unique CC blades are developed in close cooperation with Liu Guoliang, Xu Xin and other members of the Chinese National Team. The Chinese team is always talking about how important the trajectory of the ball is. With a longer trajectory you can push your opponent away from the table and take control of rallies and the game. Both the CC5 and CC7 have carbon layers inside, along with STIGA's famous NCT and Crystal treatment on the surface.

CC5 NCT

- Offensive 5+2-ply blade with Carbon powder between all the veneers that gives extra speed
 - Provides a long trajectory and power, yet well balanced
 - For the control minded attacking player who still wants power when striking the ball all your shots
- ART. NO. 1093-XX**

CC7 NCT

- Offensive 5+2-ply blade with Carbon Powder between its veneers which provide extra power and speed.
 - Outstanding long trajectory in topspin rallies.
 - For the attacking player who is looking to play topspin versus topspin.
- ART. NO. 1097-XX**

CLIPPER CC

- Offensive 7-ply blade
 - The Clipper series is one of the most popular STIGA blade series ever
 - With carbon powder between all the veneers and Crystal Surface that gives more speed to the blade
- ART. NO. 1021-XX**

OPTIMUM SERIES
WHEN THE SURFACE
IS CRYSTAL CLEAR

Crystal Technology is STIGA's unique process that hardens the surface of the blade, thus increasing its speed. You'll be amazed both by the crystalline appearance of blades treated with Crystal Technology and also by the extra zip on all your shots.

OPTIMUM PLUS

- Lightweight 5-ply offensive blade
 - Built with the same outer plies as the best-selling STIGA Offensive Classic blade
 - Slightly faster than the Optimum SYNC
 - Increased surface hardness and speed thanks to the Crystal Technology
- ART. NO. 1048-XX**

OPTIMUM SYNC

- Lightweight 5-ply allround/offensive blade
 - Built for the modern allround/offensive player
 - Increased surface hardness and speed thanks to the Crystal Technology
- ART. NO. 1038-XX**

NCT SERIES BALANCED FORCE

The STIGA NCT blades use the latest technologies - it is designed for the era that begins with the ITTF speed glue ban in 2008. In fact, it employs a secret ingredient which testing has shown helps you hit the ball harder and increases the life of the blade. The balance between speed, weight and control is outstanding in the NCT blades. With the NCT you will hit the ball harder without sacrificing control.

INTENSITY CARBON

CONTROL	60	
SPEED	124	
ELASTICITY	STIFF	
VENEER	5+2

RUBBERS

ALL STIGA RUBBERS ARE APPROVED BY ITTF

THE ACS-TECHNOLOGY allows very high speed to be combined with max springiness/elasticity in an ultralight rubber with outstanding control.

THE SYNERGY TECH rubber is the combined collaborative efforts of top table tennis chemists from Sweden and Japan.

BUILT-IN SPEED GLUE EFFECT when you want to achieve maximum power.

MEGA TENSION TECHNOLOGY creates more tension without increasing the weight of the rubber, causing quicker rubber recovery.

TRANSTENSION SPONGE and the exciting material, we have found a formula that will revolutionize and generate maximum tension and sponge power.

THE NCT TECH rubber use our nano technology, and are designed for the era that begins with the ITTF speed glue ban.

LONG TRAJECTORY: We focused on creating a longer trajectory on the ball, as a long trajectory in today's game is more and more important. The combination of spin, speed and long trajectory is unique on STIGA's rubbers; you have never felt this level of play before.

APS: The Advanced Pimple Structure with straight shaped pimples makes the rubber adapt to the ball like never before and provides an explosive and spinny rubber that is reliable in every situation.

OCS: The brand new Oxygen Capsule System is our most advanced rubber technology, specially adapted to the new poly ball. The OCS-sponge generates a very high amount of catapult effect thanks to the precisely measured size of the air pockets. This technology is developed to generate the maximum amount of speed and spin possible.

AIROC SERIES ASTRONOMICAL AMOUNTS OF SPEED

In Airoc Astro we have multiplied the amount of microscopic air bubbles (Oxygen Capsule System) in the sponge creating more intense catapult effect and speed. The new topsheet works as an energy transfer between the sponge and the ball which provides every stroke with precision and power. Developed together with members of the Chinese National Team to take advantages of the Poly Ball.

STYLE SPIN ELASTIC SPONGE SOFT

- The adoption of the poly ball changes the game for many seasoned all-around players.
- STIGA Airoc S is designed to expand shot selection and feel for control players.
- Creating a rubber sheet to provide this dynamic range of play is made possible thanks to STIGA's new OCS sponge technology (Oxygen Capsule System).
- We have formulated the air pockets within the sponge to withstand the strongest attacks while providing enough spring to go offensive on demand.
- For the ability to control the tempo and to have multiple ways to score then STIGA Airoc S is your perfect choice.

STYLE SPIN ELASTIC SPONGE MEDIUM

- Research shows the new ITTF tolerances of poly ball impact the ability to create and maintain spin.
- STIGA Airoc M was created to combat this potential loss of power.
- STIGA Airoc M utilizes our newest OCS sponge technology (Oxygen Capsule System) to increase catapult effect without changing the spin ratio. This allows aggressive players to maintain the same spin/speed proportions they have always enjoyed.
- The key to this evolutionary advancement is the delicate balance between the size of the air pockets within the sponge and the elasticity of the top sheet. STIGA's engineers tested many different pip designs and tensions to achieve the perfect rubber for the attacking player.

CALIBRA TOUR SERIES
ENJOY THE ULTIMATE
PRECISION-SHOT-MAKING
EXPERIENCE!

The special treated surface generates ultimate ball contact! Equipped with the APS-technology, it provides very high speed and the fantastic possibility to shape your shots with the increased spin features. The APS technology (Advanced Pimple Structure) with straight shaped pimples makes the rubber adapt to the ball like never before and provides an explosive and spinny rubber that is reliable in every situation.

- Tour H is suitable for players with strong hitting power who desire a rubber with built-in speed glue effect with maximum power and speed

CALIBRA SERIES
UNLEASH THE POWER OF
THE LONG TRAJECTORY

With the Calibra series we have created a totally new dimension to the game. We focused on creating a longer trajectory on the ball, as a long trajectory in today's game is more and more important. The combination of spin, speed and long trajectory is unique to this rubber series; you have never felt this level of play before. With the Calibra rubbers you will be able to perform strokes and shots never before possible. You will still have control for all the small shots and service return, but when you are attacking you will be in a totally new world. The Calibra series will take your game to another level.

CALIBRA LT

ART. NO. 9825-XX RED
ART. NO. 9826-XX BLACK
SPONGE 1,8/2,0/MAX

- Calibra LT has a medium hard sponge suitable for the highly skilled player
- Uses the unique Long Trajectory technology specially developed for the CALIBRA-series
- Built-in speed glue effect for maximum power
- Revolutionary TransTension Sponge for maximum tension and power

CALIBRA LT SOUND

ART. NO. 9827-XX RED
ART. NO. 9828-XX BLACK
SPONGE 1,8/2,0/MAX

- Calibra LT Sound has a soft sponge suitable for all types of offensive play
- Increased control for blocks and receiving serves
- A crisp clear sound when striking the ball with built-in speed glue effect

CALIBRA SPIN

ART. NO. 9868-XX RED
ART. NO. 9869-XX BLACK
SPONGE 1,8/2,0/MAX

- Calibra LT Spin has a medium soft sponge recommended for highly trained attackers
- Outstanding control for touch shots and service returns
- New possibilities for spin with Long Trajectory technology

CALIBRA LT PLUS

ART. NO. 9866-XX RED
ART. NO. 9867-XX BLACK
SPONGE 1,8/2,0/MAX

- Calibra LT Plus has an extra hard sponge for tremendous hitting power
- Excellent choice for the highly skilled player who demands a combination of spin, speed, power, and long trajectory

MAGNA SERIES YES IT'S ROCKET SCIENCE

The success of the Tension Clic, Tension Sound and Tension X-treme sponges is enormous with our Boost rubbers. We have developed a version of these sponges and combined them with our very popular Magna top sheet. The version of the Tension Clic, Tension Sound and Tension X-treme sponges is developed specifically to fit the unique characteristics of the Magna top sheet and will transform your game, bringing out the very best in each individual player.

MAGNA TC II

ALMANA SOUND SYNERGY TECH

ART. NO. 9886-XX RED / ART. NO. 9887-XX BLACK
SPONGE 1,8/2,0/MAX

- Almana Sound ST is very bouncy and gives a nice catapult effect
- The Soft sponge and top sheet are excellent for looping and counterlooping

NEOS SOUND SYNERGY TECH

ART. NO. 9882-XX RED / ART. NO. 9883-XX BLACK
SPONGE 1,8/2,0/MAX

- Neos Sound ST has a soft sponge with great feeling and good speed
- Developed in our research laboratory in collaboration with leading world-class players

NEOS SYNERGY TECH

ART. NO. 9880-XX RED / ART. NO. 9881-XX BLACK
SPONGE 1,8/2,0/MAX

- Neos ST has a medium hard sponge
- Extremely resilient surface provides great spin and speed

CARBO MC

ART. NO. 9864-XX RED / ART. NO. 9865-XX BLACK
SPONGE 1,8/2,0

- Uses a medium sponge with great spin
- Designed for club and tournament players looking for a spiny rubber with excellent control

NEOS

ART. NO. 9842-XX RED / ART. NO. 9843-XX BLACK
SPONGE 1,8/2,0/MAX

- Neos is a very interesting rubber for allround/offensive players
- Medium sponge, with great rubber recovery abilities

NEOS SOUND

ART. NO. 9844-XX RED / ART. NO. 9845-XX BLACK
SPONGE 1,8/2,0/MAX

- Neos Sound is an offensive rubber with soft sponge
- Perfect for players who like the feeling and sound of soft sponge

INNOVA ULTRA LIGHT SYNERGY TECH

ART. NO. 9884-XX RED / ART. NO. 9885-XX BLACK
SPONGE 1,8/2,0/MAX

- With Innova Ultra Light ST you will be able to deliver excellent spin, speed and power
- The soft sponge in combination with Synergy Tech technology gives the player a fantastic feeling

OPTIMUM MP

ART. NO. 9870-XX RED / ART. NO. 9871-XX BLACK
SPONGE 1,8/2,0/MAX

- Optimum MP is a combination of the Molecule Power - and the Nano Composite technology
- Medium sponge with 50% synthetic rubber and 50% a mixture of natural rubber
- Great increase of energy release when striking the ball

ALMANA

ART. NO. 9856-XX RED / ART. NO. 9857-XX BLACK
SPONGE 1,8/2,0/MAX

- Excellent for looping and counter-looping
- Almana uses the same technologies as Almana Sound but with a medium sponge

NEOS TACKY

ART. NO. 9846-XX RED / ART. NO. 9847-XX BLACK
SPONGE 1,8/2,0/MAX

- Neos Tacky offers control and is very sticky, providing plenty of spin
- Medium sponge with excellent spin on slow balls

INNOVA PREMIUM

ART. NO. 9838-XX RED
ART. NO. 9839-XX BLACK
SPONGE 1,8/2,0/MAX

- Innova Premium has the thicker ACS-sponge with medium hardness combined with an ultra-thin surface that gives the player outstanding touch
- Perfect for the allround player who focuses on control

MAGNA

ART. NO. 9840-XX RED
ART. NO. 9841-XX BLACK
SPONGE 1,8/2,0/MAX

- Magna has a medium sponge with natural rubber finish
- Good spin features due to the Natural Rubber Finish Technology
- Perfect for the allround/offensive club player

ALMANA SOUND

ART. NO. 9858-XX RED / ART. NO. 9859-XX BLACK
SPONGE 1,8/2,0/MAX

- Bouncy rubber with good catapult effect
- Almana Sound is like regular Almana but with a softer sponge

CARBO

ART. NO. 9860-XX RED / ART. NO. 9861-XX BLACK
SPONGE 1,8/2,0/MAX

- Carbo has a medium sponge with loud sound when hitting the ball
- Mega Tension Technology creates more tension and quicker rubber recovery

CARBO SOUND

ART. NO. 9862-XX RED / ART. NO. 9863-XX BLACK
SPONGE 1,8/2,0/MAX

- Carbo Sound has a soft sponge with good catapult effect
- Perfect for players who want to win points using aggressive spin.

MENDO MP

ART. NO. 9832-XX RED
ART. NO. 9833-XX BLACK
SPONGE 1,8/2,0/MAX

- Mendo MP is a more dynamic, softer and more sensitive hard rubber
- With a medium hard sponge

INNOVA

ART. NO. 9834-XX RED
ART. NO. 9835-XX BLACK
SPONGE 1,8/2,0/MAX

- Allround/offensive rubber with medium hard sponge
- Approximately 10% lighter than regular rubber

MENDO

ART. NO. 9804-XX RED
ART. NO. 9805-XX BLACK
SPONGE 1,5/1,8/2,0/MAX

- Mendo is a classic rubber ideal for the offensive player who is looking for control and feeling
- With a medium hard, resilient sponge

MENDO ENERGY

ART. NO. 9817-XX RED
ART. NO. 9818-XX BLACK
SPONGE 1,8/2,0/MAX

- Mendo Energy is a Power-Soft-Rubber with world class world class quality
- Creates maximum friction on the ball
- Perfect for the allround/offensive club player

INNOVA ULTRA LIGHT

ART. NO. 9836-XX RED
ART. NO. 9837-XX BLACK
SPONGE 1,8/2,0/MAX

- Innova Ultra Light uses the ACS-Technology in the ultimate way
- Fantastic feeling in this ultra soft rubber
- Approximately 10% lighter than a regular rubber

COBRA 2000

ART. NO. 9830-XX RED
ART. NO. 9831-XX BLACK
SPONGE 1,5/1,8/2,0

- Cobra 2000 has a medium sponge with a specially selected rubber mixture
- It absorbs a lot of your opponent's spin and gives your play more control
- Perfect rubber for the player learning to create more advanced shots

PIMPLE OUT & ANTI SPIN RUBBERS

CHOP & DRIVE

ART. NO. 9819-XX RED
ART. NO. 9820-XX BLACK
SPONGE 1,1/1,5/1,8

- Very soft sponge absorbs the ball and increases the contact time
- Produces excessive underspin when required
- Suits the defensive/allround player

CHINA EXTREME

ART. NO. 9815-XX RED
ART. NO. 9816-XX BLACK
SPONGE 1,8/2,1

- China Extreme is a very tacky rubber for competition play
- The hard sponge and tacky surface gives maximum spin when you need it the most

J.M.S EVO 1

ART. NO. 9290-20 RED/CHINA SPONGE
ART. NO. 9291-20 BLACK/CHINA SPONGE
ART. NO. 1702-0105-18 RED/JAPAN SPONGE NEW
ART. NO. 1702-0101-18 BLACK/JAPAN SPONGE NEW
SPONGE 1,8

- A perfect allround rubber with medium sponge
- Like Evo, EVO 1 is perfectly suited for an offensive style of play with a focus on control

ROYAL

ART. NO. 9801-XX RED / ART. NO. 9802-XX BLACK
SPONGE 1,5/1,8/2,0

- Royal features a medium sponge with STIGA's fastest short pips-out surface
- If you want to finish the point quickly, Royal delivers explosive power and sting

CLIPPA

ART. NO. 9808-XX RED
ART. NO. 9809-XX BLACK
SPONGE 1,5/1,8/2,0

- STIGA Legend Liu Guoliang's weapon of choice as an active player
- Short pimples rubber combined with a medium sponge
- Ideal for fast, attacking play near the table

RADICAL

ART. NO. 9810-XX RED
ART. NO. 9811-XX BLACK
SPONGE 1,8/2,0/MAX

- A short pimples out rubber with ACS-Technology
- Comes with medium sponges

POWER LT

ART. NO. 1701-0405-XX RED
ART. NO. 1701-0401-XX BLACK
SPONGE 1,8, 2,0

A great choice of rubber for players who want to take the first big step in Table Tennis.

RUBBER PROTECTOR

ART. NO. 9922-00

Protects against dust and stains.

ENERGY ABSORBER

ART. NO. 9812-XX BLACK
SPONGE 1,6/2,0

- Energy Absorber is a great anti spin rubber which controls the fiercest of spins
- Absorbs the opponent's powerful strokes and allows you to block and counter attack
- Soft sponge for maximum feeling

DESTROYER

ART. NO. 9813-XX RED
ART. NO. 9814-XX BLACK
SPONGE 0X/1,0/1,5

- Destroyer is a long pimple rubber with soft sponge for the defensive player
- The pimples are shaped to get maximum response from individual techniques

OPTIMUM 40+★★★★POLYBALL

ART. NO. 1113-1910-03 WHITE
ART. NO. 1113-2003-03 ORANGE
ART. NO. 1113-1710-10 100 WHITE
ART. NO. 1113-1803-10 100 ORANGE

A competition ball of the highest quality. Hand selected and Pre-tested. Approved by the ITTF.

COMPETITION ★★★

ART. NO. 5160-03 WHITE
ART. NO. 5165-03 ORANGE

A competition ball of the highest quality. Hand selected. Approved by the ITTF.

WINNER ★★

ART. NO. 5150-06 WHITE
ART. NO. 5155-06 ORANGE

Very suitable for youth training and people who play for exercise, who want a good quality ball that is durable.

MASTER ★

ART. NO. 5140-06 WHITE
ART. NO. 5145-06 ORANGE

A high quality ball that is good value for money, designed for the hobby player.

CUP

ART. NO. 5110-06 WHITE
ART. NO. 5115-06 ORANGE

Cup is made from pure celluloid and has no tangible joint, which means that Cup has very even bounce characteristics. Suitable, e.g. for schools.

CLUB POLYBALL

ART. NO. 1110-0310-06 WHITE
ART. NO. 1110-0403-06 ORANGE
ART. NO. 1110-0510-10 100 WHITE
ART. NO. 1110-0603-10 100 ORANGE

Club is a practice ball with playing characteristics and quality similar to many competition balls.

CLUB SELECT

ART. NO. 5120-06 WHITE
ART. NO. 5125-06 ORANGE

Club Select is a practice ball with playing characteristics and quality similar to many competition balls.

CHALLENGER

ART. NO. 5200-06 WHITE
ART. NO. 5210-06 ORANGE

A high quality ball - good value for money.

SHOES

NEW

INSTINCT II

ART. NO. 1560-0715-XX

Specially developed innersole in soft EVA to give you maximum comfort. Instinct II has a unique and special made outsole that's developed for table tennis. The pattern and grip areas are unique and one of its kind and will give you the perfect grip in all your quick moves at the table. The outsole has extra soft EVA at the forefoot and at the heel, all this to ensure that you will get the best feeling against the floor and maximum support for your foot.

SHOE WHITE/NAVY/SILVER

Sizes available: 34-46

Specially developed innersole in soft EVA to give you maximum comfort.

The outsole has extra soft EVA at the forefoot and at the heel

Unique and special made outsole for a perfect grip on the floor

INSTINCT

ART. NO. 1560-0314-XX

Developed to withstand the tough and intense movement patterns used in table tennis, STIGA Instinct offers you extreme flexibility with a feeling like no shoe before it. With its natural balance and speed you can focus entirely on your game. The Instinct sole gives you perfect grip on every surface, and the ability to move quickly. Why choose any other shoe when you can go with your instinct.

SHOE RED/BLACK/WHITE
 Sizes 36-46

**PREMIER**

ART. NO. 5520-XX

PREMIER has specific features allowing for customized support around the arch and width accommodation through the forefoot. The design at the front gives perfect grip in length and sideways movement and the extra high outer sole gives your foot extra support even when making the fastest movements. An asymmetrical heel design provides a very stable and strong support combined with comfortable padding and the extra soft EVA at the forefoot of the insole provides a genuine floor feeling. The insole is equipped with Hexagon gel support for excellent heel support and EVA stabilizer for mid foot control.

SHOE WHITE/ANTHRACITE/ORANGE
 Sizes 36-46

**PROSWEDE**

ART. NO. 1560-0113-XX

STABILITY AND COMFORT IN ONE

The ProSwedes' front design provides perfect grip in both length and sideways movement. Thanks to the extra high outer sole, your feet get extra support even when making the fastest movements, without sacrificing the flexibility and feeling. Air mesh parts allow the feet to breathe and evacuate moisture. Why choose either stability or comfort when you can get both in the STIGA ProSwede?

SHOE BLUE/YELLOW
 Sizes 36-47

**CENTER COURT**

ART. NO. 5521-XX

As table tennis becomes faster every year, footwear must accommodate the need for increased quickness and speed. The importance of reacting and accelerating more quickly than the opposition is more important than ever. Center Court is very flexible and was designed to adapt to the foot's motion, providing firm contact to the floor and enabling you to instantly change direction. Center Court is the shoe to make it happen!

TECHNOLOGY TABLES

COMPACT STORAGE SYSTEM

COMPACT SYSTEM

SAFETY SYSTEM

BAT AND BALL HOLDER

CSS COMPACT STORAGE SYSTEM

Table tennis has always occupied many people within a limited space. Training and competitions often require many tables to be available at the same time. CSS tables make it easier to store large numbers in a small space.

- The table halves are stored folded into each other, thus reducing drastically the space required.
- The height of the table is only 155 cm.
- Each table leaf has its own wheeled base, which means the table is easier to handle.

CS COMPACT SYSTEM

The new folding system minimizes the risk of injuries during table storage due to its unique compact design.

NET INCLUDED

Some of our tables comes with suitable net.

SAFETY BAR

The Safety Bar will prevent that a child can stay between the table tops.

PATENT SYSTEM FOR UNLOCKING

By pulling the metal handle, which is connected to a wire, the safety devices will be released and the table can be placed into playing position.

ONLY FOR INDOOR USE

This table should only be used for indoor playing.

OUTDOOR

This symbol indicates that the table is approved for outdoor playing.

19 mm fibreboard.
Holder for balls. EN-Norm: 14468-1 Class: D. Packaging in single carton. Weight: 85 kg. Storage size: W = 144 cm x D = 15 cm x H = 162 cm.

STYLE INDOOR CS

ART. NO. 7182-10

An elegant designed and practical indoor table with the unique Compact System. The perfect alternative for use at home.

19 mm fibreboard. Holder for balls and bats. EN-Norm: 14468-1 Class: D. Packaging in single carton. Weight: 81 kg. Storage size: W = 152,5 cm (with net 185 cm) x D = 73 cm x H = 159 cm.

PRIVAT ROLLER CSS

ART. NO. 7180-05

An adaptable STIGA table with the ingenious, CSS roller construction. The perfect alternative for use at home.

19 mm fibreboard.
EN-Norm: 14468-1 Class: B. Packaging in double cartons. Weight: 88 kg. Storage size: W = 152,5 cm x D = 66,5 cm x H = 154 cm.

ELITE ROLLER CSS

ART. NO. 7186-05

A stable and very durable roller table. The CSS construction makes the table ideal for schools, youth clubs and institutions. Perfection in its design.

25 mm fibreboard.
EN-Norm: 14468-1 Class: B. Packaging in double cartons. Weight: 109 kg. Storage size: W = 152,5 cm x D = 66,5 cm x H = 154 cm.

ELITE ROLLER ADVANCE

ART. NO. 7186-06

The closest you can come to a Pro STIGA table. And it has only 15 minutes of assembly time. Comes with quick cross bars, height adjuster, spacesaving storage possibilities, tabletop connector.

22 mm fibreboard.
EN-Norm: 14468-1 Class: B. Packaging in double cartons. Weight: 103 kg. Storage size: W = 152,5 cm x D = 60 cm x H = 172 cm.

INDOOR ITTF TABLES

EXPERT ROLLER CSS ART. NO. 7190-05

An excellent competition table, with roller trolley. This table is very stable and functional. The legs fold out automatically. It has an extra high density top with excellent bounce characteristics. ITTF approved.

OPTIMUM 30 ART. NO. 7199-05

The Optimum 30 is a table with a 30 mm thick top. As a consequence, the evenness and consistency of the ball rebound is unparalleled. The top is pre-treated multiple times and then coated with a special varnish to give just the right amount of gloss and the ideal frictional coefficient. The result is the truest possible bounce, even when balls are spun at the highest level. ITTF approved.

COMPETITION COMPACT ART. NO. 7194-05

The highest quality and precision in its play area and support. ITTF approved.

OFFICIAL TABLE SUPPLIER
WORLD TEAM CUP 2013-2015

PREMIUM COMPACT CAN ALSO BE ORDERED AS A WHEELCHAIR FRIENDLY TABLE

PREMIUM COMPACT
 ART. NO. 7197-05

The World Class table with the unique and safe Super Compact System. This model is ready assembled for playing. The Premium Compact is ITTF approved.

25 mm fibreboard.
 EN-Norm: 14468-1 Class: A Packaging and delivered on a disposable pallet. Weight: 141 kg. Storage size: W = 152,5 cm x D = 55 cm x H = 162 cm.

EXPERT VM
 ART. NO. 7195-05

Expert VM is a World Class table with a 30 mm thick table top. As a consequence, the evenness and consistency of the ball rebound is unparalleled. Two heavy duty wheels are built into every leaf. The Expert VM is ITTF approved.

30 mm fibreboard.
 EN-Norm: 14468-1 Class: A Packaging in double cartons. Weight: 164 kg. Storage size: W = 152,5 cm x D = 19 cm x H = 142 cm.

STIGA ELITE CENTER

To have access to the STIGA Elite Center has meant a lot to Danish Table Tennis. In today's table tennis world it is vital to have a big and high-level training group at every single training session. With the STIGA Elite Center we have this opportunity, and we have all the Danish national team players under the same roof. That means that we can focus very hard on each individual player and make sure that they are making the right progress.

In order to always have a very high level of training for every session, we always make sure to frequently invite guest players who give us extra energy in the training. Sometimes we also invite national teams to our center to increase the training level. China, Japan, Sweden and other national teams have joined us for training, and this is very valuable for all parties.

GLOSSARY

BLADES

ELASTICITY: The control of the ball is affected when the ball gets in contact with the bat. The elastic properties of a blade make you feel this contact. It depends on the players what type of elasticity he or she likes best. Take these categories into consideration and you will surely find the right blade for you.

ELASTIC: Offering low speed with maximum control. Mostly used by the cautious defender.

FEELING ELASTIC: The enhanced touch and feel characteristics are a distinct advantage for players who like to be in command of control and accuracy for the allround spin game.

POWER ELASTIC: Power elastic blades benefit the spin player a wide variety of attacking styles.

NEARLY STIFF: For consistent powerful forehand and backhand top spinning loop play. Nearly stiff blades are ideal for players who want to set the momentum and dictate the play.

STIFF: The ultimate selection for the direct power-hitting player who primarily concentrates on pure speed than control.

RUBBERS

SPONGE HARDNESS

SOFT: Soft sponges provide a better ball control. The spin remains the same while the speed is slightly reduced. Common among players that what to have a great sound during their game.

MEDIUM: Medium sponge is superb for active and powerful players. A well balanced relation between control, speed and spin.

HARD: These sponges provide more speed but less control of the ball when striking the ball.

SURFACE

STICKY: This rubber sheet offers much control and is very sticky, which provides plenty of spin when striking the ball.

CONTROL ELASTIC: They develop spin elasticity even at the low speed, and give you more control and more fun. Suitable for control-minded players that want to have the extra touch in their game.

STICKY ELASTIC: Slightly sticky rubbers with very good spin dynamics and ball control while playing at a high speed, both away and near the table.

OFF ELASTIC: Intelligent mixed between speed and spin dynamic. Off elastic rubbers is for speed players that use a lot of top spin in their game.

SPIN ELASTIC: Spin elastic rubbers are for the modern top table tennis. They are as fast as the off elastic rubbers, but have an additional spin component. Very sophisticated technology.
