

DYNAMIC FRICTION

SOLID TECHNOLOGY FOR THE PLASTIC BALL

WE GRAB BETTER

Official plastic ball is excitingly bouncy
but it is slippery on the surface and harder to control.
Pro players should meet the critical challenge now.

DYNAMIC FRICTION technology
evolved from Snow Tire was developed for the new plastic ball.
It is also Physic-Chemically stabilized.

Get ready for the new table tennis
And
Win With Us.

The diagram illustrates the relationship between Strategy, Distance from Table, and Expertise. It consists of three horizontal bars with labels above and below them, and a central vertical axis.

- STRATEGY** (top bar): Labeled *CONTROL*, *MIX*, and *AGGRESS* from left to right.
- DISTANCE FROM TABLE** (middle bar): Labeled *CLOSE*, *MID*, and *FAR* from left to right.
- EXPERTISE** (bottom bar): Labeled *ELITE*, *PRO*, and *TOUR* from left to right.

The central vertical axis has arrows pointing outwards from the middle bar towards the top and bottom bars, indicating a progression or relationship between the levels.

The image displays four horizontal scales, each representing a different attribute: SPEED, SPIN, and PRECISION. Each scale is a horizontal bar divided into 100 equal segments, with a double-headed arrow at each end. The scales are labeled with various terms and values:

- SPEED:** Labeled with *MID* at the left end, *HI* at approximately 25%, *AVG* at approximately 40%, **IMPACT** at approximately 55%, *VHI* at approximately 70%, *HARD* at approximately 85%, and *EXT* at the right end.
- SPIN:** Labeled with *MID* at the left end, *HI* at approximately 25%, *SOFT* at approximately 40%, **CONTACT** at approximately 55%, *VHI* at approximately 70%, *SOLID* at approximately 85%, and *EXT* at the right end.
- PRECISION:** Labeled with *MID* at the left end, *HI* at approximately 25%, *AVG* at approximately 40%, **CONTROL** at approximately 55%, *VHI* at approximately 70%, *SOLID* at approximately 85%, and *EXT* at the right end.

The image shows three horizontal progress bars, each with a white arrow pointing to the right. The bars are labeled on the left and have three segments marked with labels above them.

- STRATEGY:** The bar is divided into three segments labeled *CONTROL*, *MIX*, and *AGGRESS*. The *CONTROL* segment is the largest, followed by *MIX*, and then *AGGRESS*.
- DISTANCE FROM TABLE:** The bar is divided into three segments labeled *CLOSE*, *MID*, and *FAR*. The *CLOSE* segment is the largest, followed by *MID*, and then *FAR*.
- EXPERTISE:** The bar is divided into three segments labeled *ELITE*, *PRO*, and *TOUR*. The *ELITE* segment is the largest, followed by *PRO*, and then *TOUR*.

VTUBE

SYNERGETIC MOTIONFIT

The combination of a rubber outsole with enhanced traction, VTUBE and a lightweight phylon midsole maximizes durability, cushioning, traction, ventilation, and overall performance

PATENT PENDING TECHNOLOGY

VTUBE is patent pending technology that allows the air to come in and out of shoe allowing the player's feet to stay cool

VTUBE

SYNERGETIC MOTIONFIT

The combination of a rubber outsole with enhanced traction, VTUBE and a lightweight phylon midsole maximizes durability, cushioning, traction, ventilation, and overall performance

PATENT PENDING TECHNOLOGY

VTUBE is patent pending technology that allows the air to come in and out of shoe allowing the player's feet to stay cool

V-COOLER

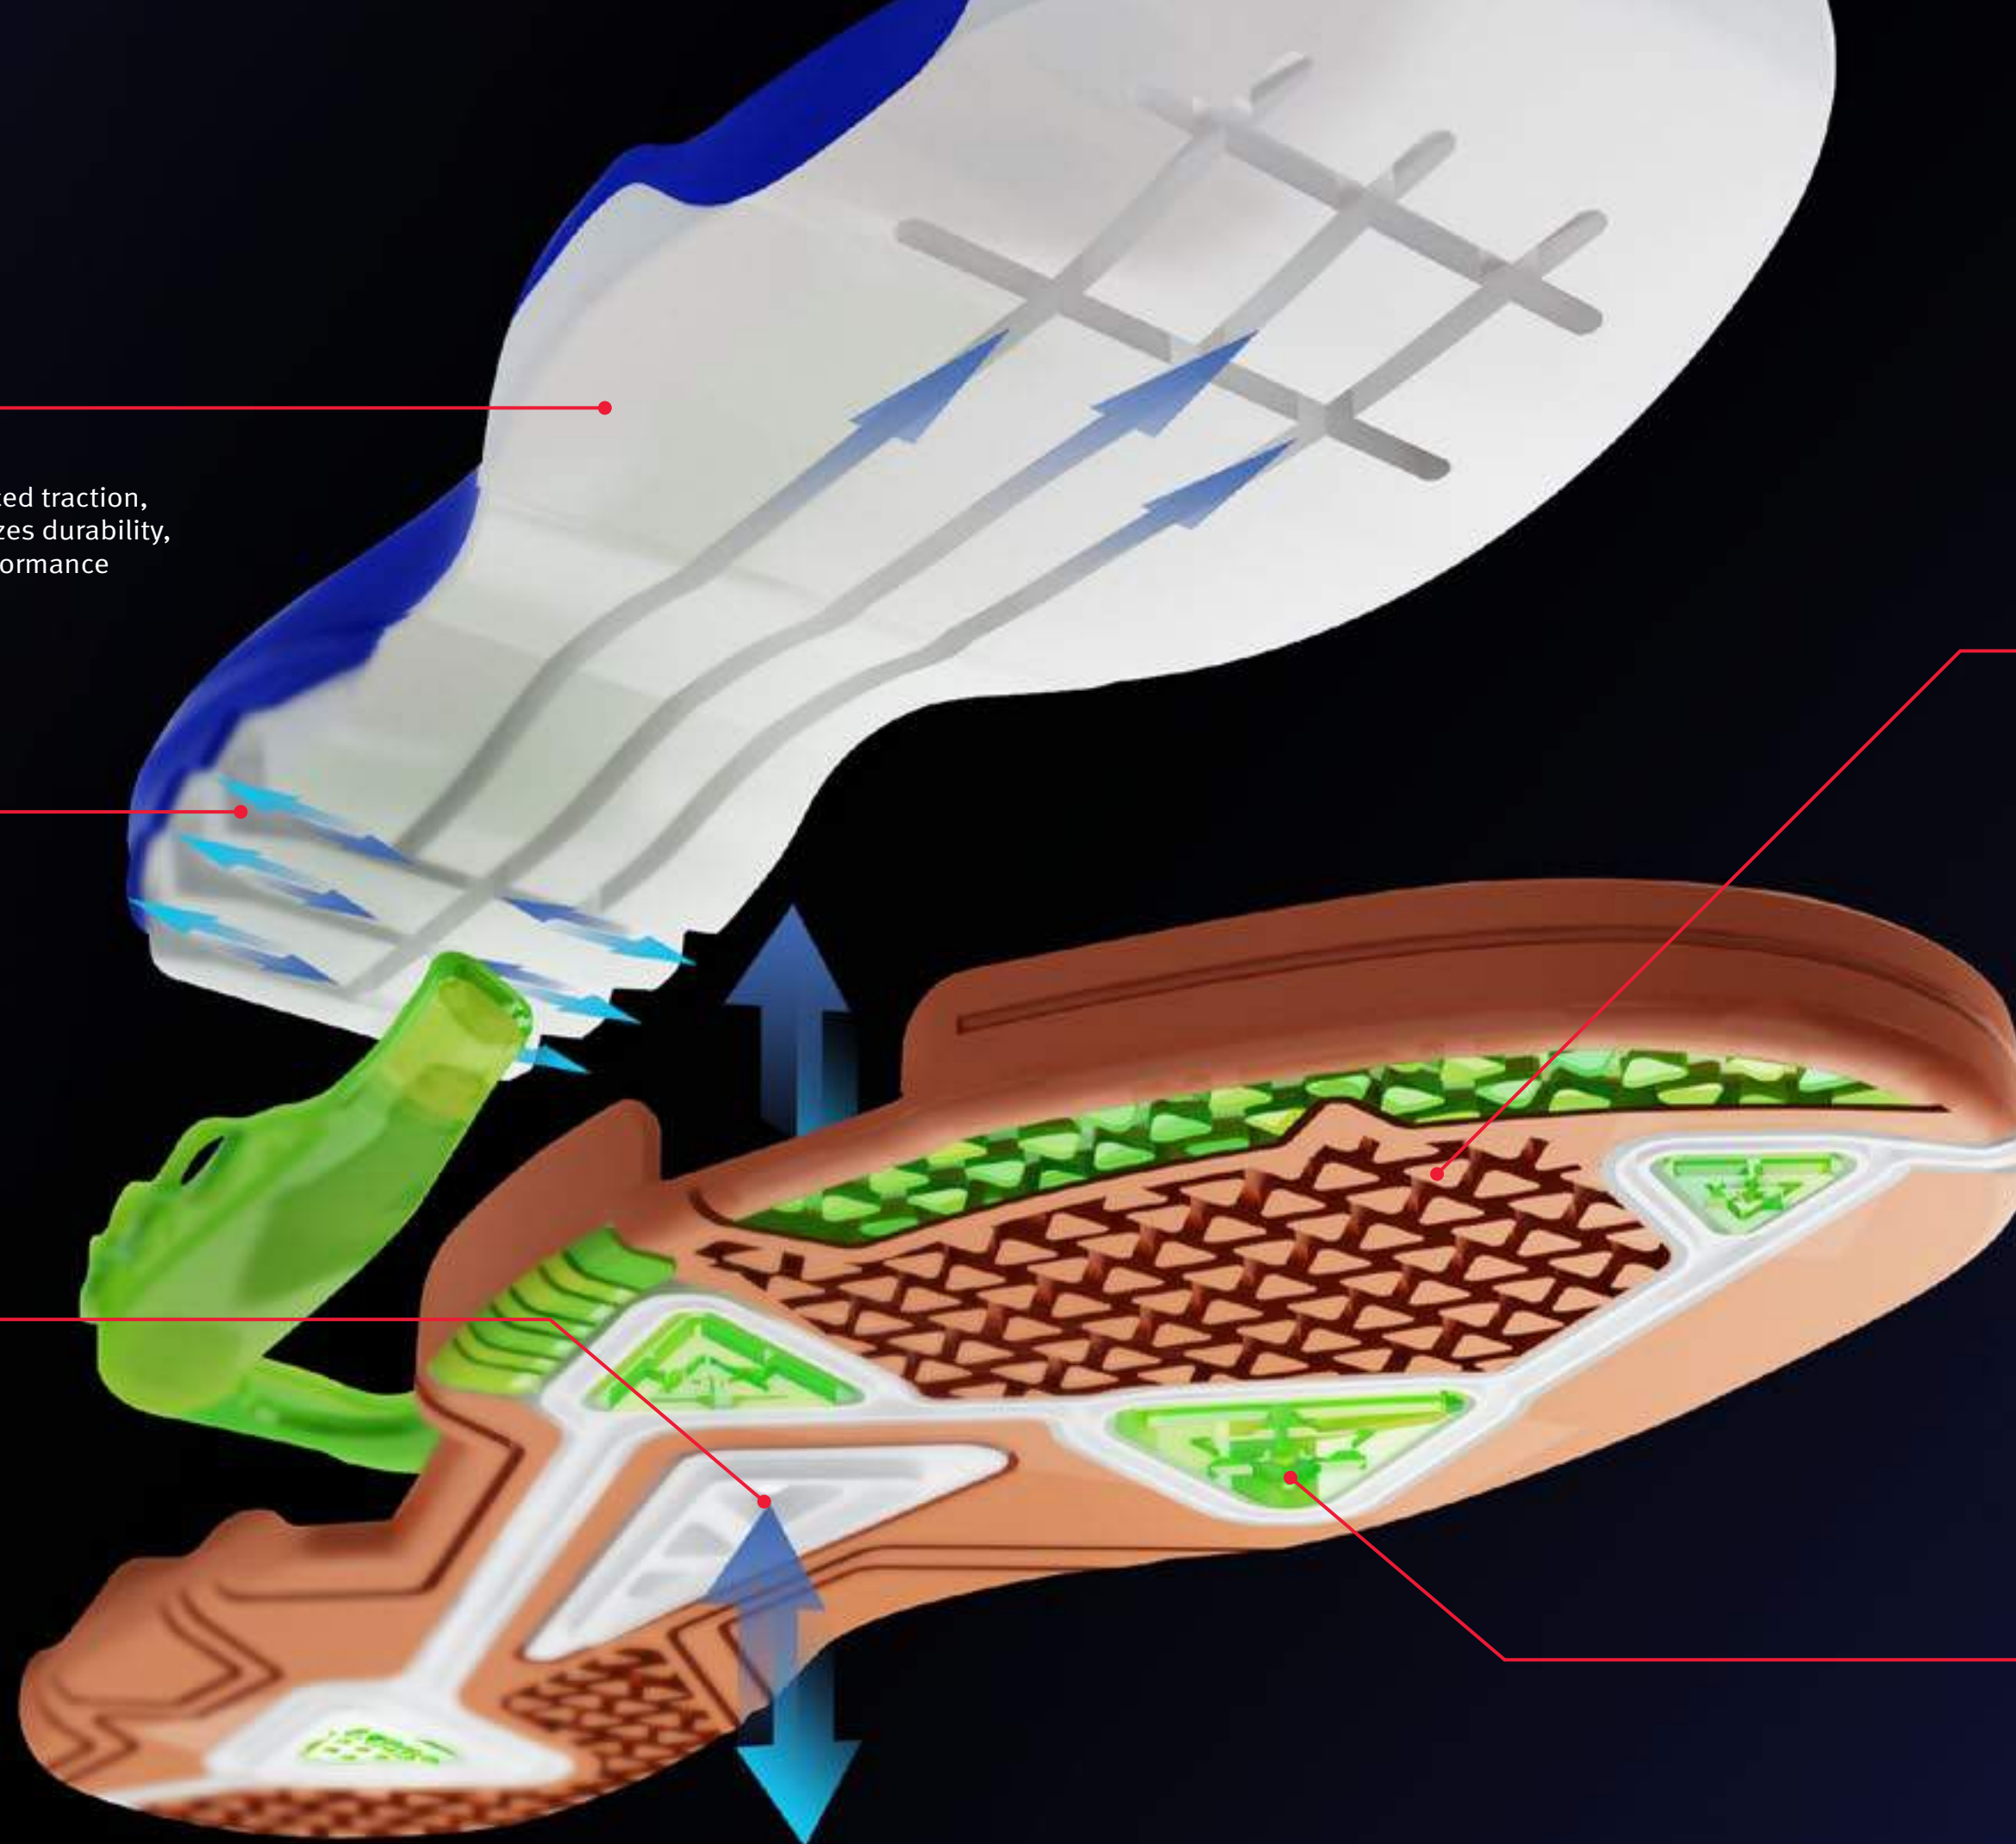

V-COOLER enhances the air going in and out of the outsole air tunnel, which keeps the foot dry and cool

G-CELL RUBBER

Non-marking G-Cell shape is comprised of rubber which increases the grip of the shoe

TRACTION BELT

4 traction parts to the forefoot, midfoot and heel
It keeps the player balanced and more stable when moving right and left, and front and back

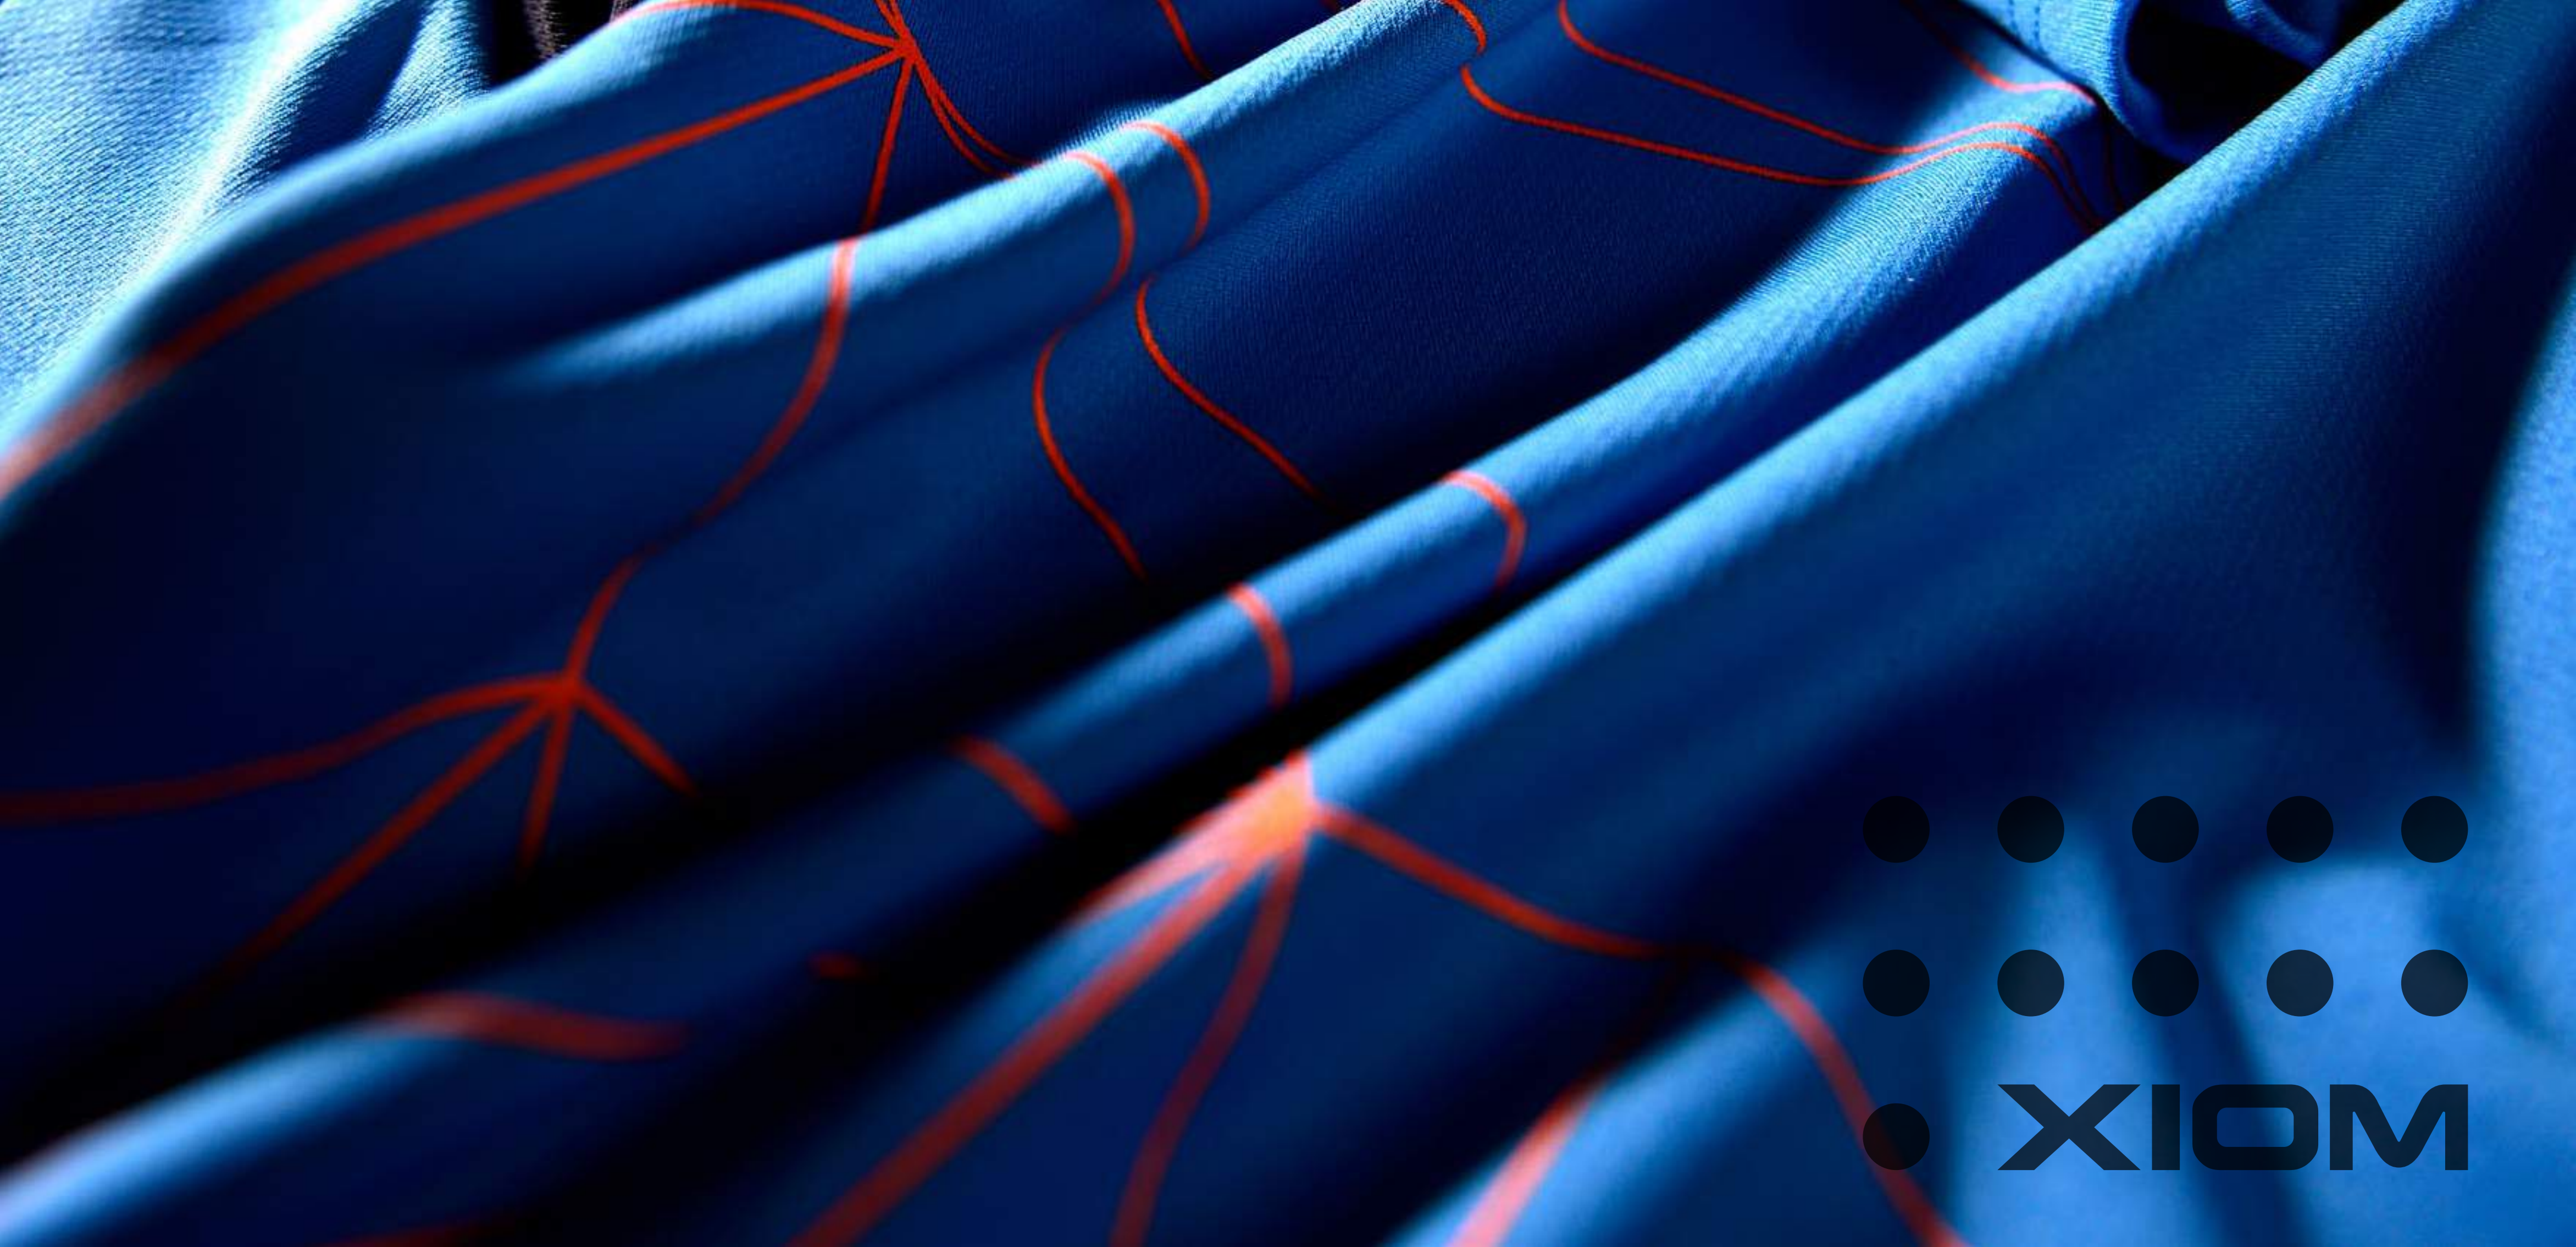

VTUBE

VTUBE

VTUBE is patent pending technology that allows the air to come in and out of shoe allowing the player's feet to stay cool

Shoe and laundry pocket

Dimension: 50x22x32cm

XBP.14

Water-resistant, durable fabric construction

Dual-zip main compartment with internal organizer

Internal padded laptop sleeve

*Adjustable, padded shoulder straps and foam padded back panel
for a comfortable and fit*

Dimension: 31x18.5x49cm

XTB.14

Water-resistant, durable fabric construction with piping details

Dual-zip main compartment with internal organizer

Zip and velcro pockets at front and back

Adjustable, padded shoulder strap

Dimension: 40x14.5x30cm

XSLB.14

Lightweight, soft fabric construction

Foam padded main compartment

Made perfectly to fit racket, balls and other items

Padded shoulder strap with a mini pocket

Dimension: 21x6x44cm

XRC.14

*Water-resistant, durable fabric construction with piping details
Front, zip pocket and inner foam cushion
Internal elastic strap to hold a racket
Dimension: 29x5x18.5cm*

TBOL / YBOL

*Most innovated Ball case ever created
Can store up to 3 balls
Made out of Silicone, to prevent stretching and transforming
Material: Silicone, PVC (VOC FREE)
Dimension: 8x7x3.8cm*

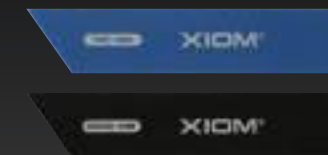

XHC.14

*Durable ABS, shockproof and waterproof racket case
Internal foam cushion for protection
Inner zip mesh pocket and racket clip
Dimension: 18.5x27x4.5cm*

ZET

Racket edge protector
Edge protector of fashionable design and high functionality. ZET is made of protective material, and it is slightly thicker than conventional edge tapes. ZET gives your racket more prominent look.
W 10/8/6 mm × L 500 mm

T-GRINDER

Blade grinder
Rough #180, Fine # 400

T-ROLLER

Rubber roller for I-Bond
Aluminum roller to help fixing your rubber on the blade. Smooth surface and shining silver color make your sticking work pleasant.
L 180 × D 35mm

FS 6

Cushioned foot for comfort and shock absorption
Elastic arch support
Color combinations with stripe
Cotton / Nylon / Polyester

FS 7

Cushioned foot for comfort and shock absorption
Elastic arch support
Vivid color mix and match
Cotton / Nylon / Polyester

I-CLEAN 100ml

VOC-free rubber cleaner

I-CLEAN is a new, water based rubber cleaner. It is completely VOC-free. So there is no worry about failing racket control before/after match due to the remaining VOC from cleaner

I-SURE 25ml

VOC-free blade coat

I-SURE is VOC-free, water based blade coat. It is a partner of I-BOND and I-PSA. It protects the blade surface from the damage that can occur when covering (rubber) is removed from the blade

I-BOND 25ml

Water based VOC-free glue

I-BOND is water based glue for fixing rubber on blade. White sponge at the bottle tip helps applying glue on rubber sponge or blade surface. Coating of blade surface by I-SURE is strongly recommended because the adhesive force of I-BOND is strong

I-PSA

Adhesive sheet

for TENSOR BIOS rubbers

I-PSA is very easy solution for fixing rubber on blade. Both sides of this very thin transparent sheet is adhesive. You can save the time taken by waiting the drying of glue. Coating of blade surface by I-SURE is strongly recommended before using I-PSA

L 170 × W 180mm

T-FOIL

Rubber protection film

L170 × W 170 mm

T-CAPSULE

Soft sponge

Premium cleaning sponge with metal case

MLV°

PRICE PERFORMANCE

EQUIPMENT MAKES A BIG DIFFERENCE IN TABLETENNIS GAME. THIS RACKET WAS DESIGNED FOR THE LIFESTYLE PLAYERS TO ENJOY THE REAL EXCITEMENT OF TABLETENNIS - WITH THE QUALITY EQUIPMENT AND AT A LOWER COST. OUR EXPERTISE CREATED THE AWESOME PRICE VALUE FOR THE RACKET.

SPIN PERFORMANCE

TABLETENNIS IS A SPORT OF SPIN. THE NEW CONSTRUCTION OF *m*-SERIES RACKET ENHANCED THE SPIN RATE SIGNIFICANTLY. TOP SHEET FRICTION AND SPONGE ELASTICITY WERE SCIENTIFICALLY COMBINED TO PROVIDE MORE SPIN - BY TRANSFERRING THE ENERGY MORE EFFICIENTLY TO THE SIDE.

WEIGHT PERFORMANCE

BALL POWER CAN BE INCREASED BY THE ADDITIONAL WEIGHT OF THE RACKET. THE HEAVIER WEIGHT CAN INCREASE THE PERFORMANCE BUT IT ALSO BECOMES HARDER TO PLAY WITH. *M*-SERIES CONSTRUCTION ENHANCED THE POWER PERFORMANCE WITHOUT ANYWEIGHT INCREASE - BY REALLOCATING THE WEIGHT BALANCE WITH THE LIGHTER WOOD MATERIALS.
